יהושע

Yahushua

Our Moshiah/Messiah

What follows goes with the teaching “Restoration of the Scriptural Year”, and what I have been telling People for some time now. **Get Prepared!** I have talked with people about this in person, in emails, in teachings, and I have posted it on the Restoration of All Things Network when speaking on many different topics. I knew the time was short and the need was urgent. But most do not listen as they do not believe that things will ever change, they are comfortable as a slave in this beast system. Even in writing this, I expect that many will just cast it aside. But I have done what I can do, the rest is up to each individual and family to get prepared. I cannot do it for them and we have our own mishpacha/family/congregation to think about. For those who are trying to get ready, I pray that what follows will be a help. I have spent a great deal of time trying to gather all of the information for us, and to be able to share it with others. This is by no means the whole of everything you need to prepare. But a short teaching and then an attempt meant as a “Help Guide” so to speak, with some of the supplies and ideas that I have come up with, and what I myself am doing to prepare. I hope this will be a helpful resource for those who want to, and/or is trying to prepare, to understand what is needed and to get you in the right thought line. So that you will get what is needed for you and your family, **BEFORE you need it!** Everyone needs to understand that **whatever you intend to do to get prepared, do so now with-out delay.** Prepare everything you are able to prepare, and Yahuah will provide the increase, as He is Our Only Refuge.

~ Shalom Yahushua ben Moshe Elijahu

THE PESACH/PASSOVER:

DATE: Aviv 14th 5993 s.c. – Pesach/Passover Day Which is the “Day of Preparation”

WHEN: During YHRIM Pesach/Passover Service around the 11th Hour of the Day while the Pesach Lamb was roasting.

Below is what Yahuah spoke here on Aviv 14th. I wish I could remember Word-for-Word what was spoken, but I have written the main part which I could remember and will never forget.

WHAT: Yahuah Declared through Tongues & Interpretation a Message Which stated that

He Is our Protection! And What Follows we are to Listen to! As it is HIS Word Alone.

Then He Gave That Word To Another.

YAHUAHS MESSAGE TO YISRAEL:

GET YOUR STAFF IN YOUR HAND AND YOUR SHOES ON YOUR FEET!

AS THE TIME THAT YOU HAVE WAITED FOR HAS COME!

THIS DAY IS THE END OF THE EXILE OF YISRAEL!

DATE: Aviv 16th 5993 s.c. – The Day of the Wave Sheaf - On this Day the Priests Waved the Sheaf 1st Fruits Grain Offering unto Yahuah. Also the Day that Yahushua Arose from the Grave and took a handful of People (the Wave Sheaf) and appeared before the Father Yahuah with the sheaf in His Hand.

WHEN: During the YHRIM Aviv 16th Wave Sheaf Service

WHAT: Over the course of a few minutes, Yahuah once again gave me another revelation pertaining to the 70 Weeks of Daniel, which I shared with our congregation.

THE 3RD PROPHECY IN THE 70 WEEKS OF DANIEL & THE 7 YEAR TRIBULATION:

I will try to keep this short. But also attempt to thoroughly explain and share what Yahuah brought to my mind and then showed me from His Word on this past **Aviv 16th** over the course of just a few minutes. Which re-confirms what Yahuah spoke on Pesach/Passover Day, which is listed on page one. It pertains to the Timeline from Yahuahs Word (Restoration of the Scriptural Year Teaching) I cannot go over the entire Timeline Teaching, those of you who have heard it know that takes approx 15 hours to teach. *(The last part of this message, is on our website as I have it on YouTube for free viewig.)* So I will only pull a few sections which are required to explain this.

The timeline begins with Ahdahm/Adam in Year 1 s.c. (**s.c. = Since the Creation of Ahdahm**) and goes through the Word until the year 6000 s.c. which is the end of mans rule. But for the purposes of this teaching we are going to begin when Yisrael Crossed Yarden/Jordan River in the year **2488 s.c.** This is after the death of Moshe/Moses, and is the **10th Day of Aviv 2488 s.c.**

Slide #73 from the "Restoration of the Scriptural Year"

Sefer Yahshar / Scroll of Jasher 88:9

Yahoshua and Yisrael Crossed Yarden River

Yahoshua 82 years old

40th year - 1st Month - 10th Day of the Month

70 days after Moshe's Death

Aviv 10th 2488 s.c.

Avainus Melech/King of Chittim in the 31st Year of his reign, waged war against Edom and conquered it in the 5th Year since Yisrael crossed Yarden River.

Slide #74 from the "Restoration of the Scriptural Year"

Sefer Yahshar / Scroll of Jasher
90:1-2 / 76:23 / 77:28-51 / 78:1-3 /
78:7 / 90:6-8

In the 5th year since Yisrael crossed Yarden

The 5th year since Yisrael crossed Yarden and the
 31st Year for Avianus is the SAME YEAR

Scriptural Counting of the 'in the 5th year' since crossing Yarden

Year:	2488	2489	2490	2491	2492
	1	2	3	4	5

5th year (since Yarden) = 31st year of Avianus = 1st year Avianus over Edom = 2492

2492 s.c.

Avianus died in the 38th year of his reign over Chittim, which was in the 7th Year of his reign over Edom.

Slide #75 from the "Restoration of the Scriptural Year"

Sefer Yahshar / Scroll of Jasher 90:13-28

Yahoshua Divided the Land

Yahoshua Divided the Land among the Tribes of Yisrael.

Avianus died in the 38th year of his reign, which was the 7th year of his reign over Edom

Avianus's Reign	31 st	32 nd	33 rd	34 th	35 th	36 th	37 th	38 th
YHWHs Calendar	2492	2493	2494	2495	2496	2497	2498	2499
7 years over Edom	Conquered Edom	1 st	2 nd	3 rd	4 th	5 th	6 th	7 th

2499 s.c.

Sabbatical Year

You'll notice in the above diagram brings us to the year **2499 s.c.**, also note that in this year Avianus Died in the 7th Year of His Reign over Edom (Remember King Avianus, we'll get back to him later). It is important to note that this is a Sabbatical Year, the 7th Sabbatical Year in that cycle. **In this same year 2499 s.c. is when Yahushua/Joshua divided the land amongst the 12 Tribes of Yisrael.**

The next year was a Yovel/Jubilee Year in **2500 s.c.** in which time Yisrael rested in their cities.

Slide #76 from the "Restoration of the Scriptural Year"

After Yahoshua Divided the Land in 2499 s.c.

Yisrael Rested in their Cities

2500 s.c.

50th Yovel

Now what does all of this have to do with the 70 Weeks of Daniel & The 7 Year Tribulation? Two main points. First let's look at the connection with this to the 70 Weeks of Daniel. Going back to **Slide #73**, it is very important to note what day that Yahushua/Joshua ben Nun and kol/all Yisarel crossed Yarden/Jorden River. It was the **10th Day of Aviv 2488 s.c.** What is this day? **It is the day that the Pesach Lamb is Selected**, this is showing us the very beginning of the Preparations of the Pesach Season.

If it is the Pesach season in **Slide #73**, then what would 5 years later be in **Slide #74**? Five years later again would bring us to the **Turn of the Year, Aviv, & the Pesach Season**, **"...at the time that melechim go out to battle..."** Divre Hayamim Alef/1st Chronicles 20:1. In this case it is speaking of when **Avainus** goes out to battle and **conquer Edom** in the year **2492 s.c.**

Now in the teaching I have done on the Restoration of the Scriptural Year, in one part I spoke about the verses that is written in Daniel 9:24-27. And I explained how the 70 weeks pertained to this day and time. But I did not have the full understanding, as I thought the 70 weeks that was written about in these versus were only a dual prophecy. The 1st part speaking about Yahushua's first coming, and the 2nd part speaking of His Return.

However there is a 3rd part to this Prophecy that is written in verse 24:

Daniel 9:24 **Seventy weeks** are determined upon your people and upon your kadosh city, to **finish the transgression**, and to make an end of sins, and to make reconciliation for iniquity, and to bring in everlasting tzedakah, and to seal up the vision and prophecy, and to anoint the Most Kadosh.

Question#1: Has Yisrael stopped breaking Yahuah's Word and ended sin? No, not fully but the true remnant is trying to do everything that they know and understand. That part of the verse will not be fulfilled completely until Yahushua's return when the fullness of His Word is taught, and when He rules with a rod of iron.

Question #2: How do you **"Finish Transgression"**? Transgression means to break commands, wouldn't this also be covered under the **"end of sins"**? OR Is this speaking about when the **National Penalty For Transgression** is finished?? Remember Yisrael throughout the Word, over and over, is **judged and chastised as a Nation**. Read the book of Shophtim/Judges, or for an easy example when Yisrael was taken to Bavel/Babylon because they broke the Land Sabbatical Years. So they were exiled to Bavel for 70 Years, which was the number of Land Sabbatical Years they did not keep, meaning they had not kept the Land Sabbatical Year for 500 Years.

When does this penalty of Exile end? **Daniel 9:24** **"...Seventy weeks** are determined upon your people and upon your kadosh city, to **finish the transgression*..."** How long is "70 Weeks"? A Day per Year? Seven Days in a week, 70 weeks times 7 is 490 Years. **BUT What Years?!** Just Any Year? Or is the 3rd part of Daniels Prophecy speaking of **490 Sabbatical Years**????!

70 (weeks) x 7 (days in a week) = 490 ? A day per year scenario.

But not just any year, **490 Sabbatical Years**.

How many Total Years would be Covered by 490 Sabbatical Years?

In the beginning of the Restoration of the Scriptural Year teaching, I show what the Word States on how many Sabbatical Years is in the 6000 Years of mans rule. It is easy to calculate this as seen at the bottom of [Slide #14](#):

[Slide #14](#) from the "Restoration of the Scriptural Year"

6000 YEARS APPOINTED UNTO MANS RULE

Beresheeth 6:3

6000 ÷ 50 = 120 Yovel Years

Tehillim 90:10

840 ÷ 12 = 70 Years

In 6000 Years there are 840 Sabbatical Years

50 = 7 Sabbatical

100 = 14 Sabbatical (7 x 2 =14)

1000 = 140 Sabbatical (14 x 10 = 140)

6000 = 840 Sabbatical Years (140 x 6 = 840)

14

But today we need to know how many years would it take to get 490 Sabbatical Years. Well as seen above, there is 140 Sabbatical Years in 1000 Total Years, and as mentioned earlier 70 in 500 years.

So 140 (1000 Years) + 140 (1000 Years) + 140 (1000 Years) + 70 (500 Years) = 490 Sabbatical Years in 3500 Total Years. What was Yahuah speaking to us in the 3rd Part of the Prophecy of Daniel? The end of the 2nd Exile of Yisrael "...to finish transgression..." would be after 490 Sabbatical Years which total is 3500 years, beginning from a particular point in time. This past year 5992 s.c. was the last Sabbatical Year before Yahushuas Return, and as Yahuah spoke here on Aviv 14 (which is on page 1) just before the Pesach Meal the **EXILE OF YISRAEL HAS ENDED!!!!**

Yahushua/Joshua crossed Yarden River on Aviv 10th 2488 s.c. the exact Day that the Pesach lamb is selected, 5 Years Later King Avianus conquered Edom and enslaved them in the Year 2492 s.c. This seems unrelated, but let's continue further on and it will begin to come into perspective of why this had to be the Year that this count began.

2492 s.c. + 3500 years (490 Sabbatical Years) = 5992 s.c. – The Last Sabbatical Year in the count of 490 Years or the 3rd part of the 70 Weeks of Daniel.

But why is Avianus and Edom even mentioned????!!!! What does this have to do with Yisrael??! Who is Avianus a type of? This beast government system, they have conquered Edom which are who? Edom is the children of Esav and Yishmael, now known as the muslims or islamic Beast! This Beast government System has conquered the muslims and is using them to their own ends. This is why all of the different countries in the middle east, their governments being overthrown and taken over by the muslims. This is the fulfillment of the prophecy of Yitzchak/Isaac to Esav in Beresheeth 27:40 "And by your sword shall you live, and shall serve your brother; and it shall come to pass when you shall have the dominion, that you shall break his yoke from off your neck." This is the Word being brought forth to life and taking place right before our eyes! They now have the dominion, and they are now taking over the nations of the earth with the help of and at the direction of the elites in this beast system. Each thinks they are using the other. The muslims think they are using the governments and elites to take over nations to enact & enforce

sharia law. The elites think they are using the muslims to enact a one world government with total control over the slave population. **But what neither of them understand is that both of them is working for Yahuahs Plan, just as King Avianus did!!**

When did the new “King Avianus” type Elites begin to use their control over the muslims which they have conquered, to overthrow the nations to bring in their one world government? After the beginning of the 2300 Days of Daniel which began on the 1st Day of Chanukah, the 9th month and 25th day last year 5992 s.c (dec 30th 2010). The internationally publicized protest which led to the overthrow of the government and take over by the muslim brother hood/Al-Qaeda was in Egypt, where things has since deteriorated much further for the actual people living there. This was first broadcast on international news sometime around jan 25th, which was 10th month 21st day of 5992 s.c.

So if the “King Avianus” type Elites/Governments conquered the muslims last year in 5992 s.c. to do their bidding, when will this “King Avianus” beast die? **At the End of the 1290 & 2300 Days of Daniel, which both end on Aviv 21st 5999 s.c.** when the abomination of desolation is destroyed and the set-apart place is cleansed.

And just as Yahushua ben Nun is a type of **Yahushua ha Moshiach, and divided the land among the 12 Tribes of Yisrael in 2499 s.c.** (which was the 7th Sabbatical Year in that cycle) After Yahushua returns, sometime between Aviv & Shavuot during the year 5999 s.c. (which is the 7th Sabbatical Year in the 120th cycle), **Yahushua will once again divide the Land of Yisrael among the 12 Tribes!!** Then in the 120th Yovel/Jubilee the year 6000 s.c, Yisrael will rest in their cities, just as they did in Yahushua ben Nun’s Day in the Year 2500 s.c, again Yahushua ben Nun being a type of Yahushua ha Moshiach.

Slide #75 from the “Restoration of the Scriptural Year”

Sefer Yahshar / Scroll of Jasher 90:13-28

Yahoshua Divided the Land

Yahoshua Divided the Land among the Tribes of Yisrael.

Avianus died in **the 38th year** of his reign, which was **the 7th year** of his reign over Edom

2499 s.c.
Sabbatical Year

The Beast “Avainus” Government

Conquering “Edom” who today is the Muslims, thinking they can use them to accomplish their ends, the NWO or a one world government. They will die in the 7th Year of their rule over Edom upon Yahushua’s Return.

They have begun in 5992 s.c and will continue until Aviv 21st of 5999 s.c. Which is the end of the 1290 days & also the end of the 2300 Days of Daniel 12. After which Yahushua will divide the land once again among the 12 Tribes of Yisrael

YHWHs Calendar	5992	5993	5994	5995	5996	5997	5998	5999
“Avianus Type” Systems	Conquered Edom	1 st	2 nd	3 rd	4 th	5 th	6 th	7 th
Rule over “Edom”								

5999 s.c.
Sabbatical Year

From the year 2492 s.c. when King Avianus conquered Edom, until last year when this “Avianus Type” Beast system has conquered and is using Edom in 5992 s.c. (which was a Sabbatical Year) **is exactly 3500 Years or 490 Sabbatical Years (2492 + 3500 = 5992 s.c.)** This is the 3rd part of the prophecy in the 70 Weeks of Daniel. The Exile of Yisrael has now ended by Yahuahs Word, this is a Great and Awesome time for Yisrael. A time that many generations have looked forward to. **But** at the same time we must understand and know, just like when the exile was over in Mitzrayim in Moshe’s Day, they were prepared to leave, and on the 16th Day of Aviv, the 2nd Day of Chag Matzoth, they left out of Mitzrayim, which was where all who were alive in those days had been born and raised, they left the comforts to flee into the wilderness. **We must be prepared to do the same.**

How Does the 1st Exodus & the 7 Days of Chag Matzoth/Feast of Unleavened Bread Show the 7 Year Tribulation?

During YHRIM services on the last day of Chag Matzoth/Feast of Unleavened Bread, Aviv 21st, Yahuah began to bring more things to my mind about the 7 Year Tribulation. **The 7 Days of Chag Matzoth & The 1st Exodus of Yisrael is a Shadow of the 7 Year Tribulation.**

Yisrael will be freed through a [series of deliverances](#), just like in the 1st Exodus. This is easier to explain in person, but I have tried to make a table below to explain how the 7 Days of Chag Matzoth is a Shadow of the 7 Year Tribulation. Viewing from left to right, the 1st column is the Restored Year. The 2nd Column is Which Specific Year of Tribulation. The 3rd column is the What Day of Chag Matzoth, which is a shadow of that specific Year. The 4th Column is what Yisrael was doing on that day during the 1st Exodus, which is a shadow of what we will be doing during that year of Tribulation. The 5th Column is a few verses from the **Sefer Yahshar/Scroll of Jasher**, I didn't list all the verses from **Shemoth/Exodus** to save space and everyone should be familiar with them anyway.

Year	What Year of Tribulation	Day of Chag Matzoth	What was Yisrael doing on that Day	Verse
5992 s.c.	1 st	Aviv 15 th – 1 st Day	Gathered at Ramses & Encamped at Sukkot	Yahshar 81:5
5993 s.c.	2 nd	Aviv 16 th – 2 nd Day	1 st Day of their Journey as they Left Mitzrayim	
5994 s.c.	3 rd	Aviv 17 th – 3 rd Day	2 nd Day since they Left Mitzrayim	
5995 s.c. 7 th Month begins last 3 ½ Years	4 th	Aviv 18 th – 4 th Day	3 rd Day since they Left Mitzrayim Many men of Pharaohs Armies left Mitzrayim/Egypt During the 3 rd day to chase after Yisrael A Shadow of the flood sent out by the beast at the beginning of the last 3 ½ Years in Gilyahna/Revelation 12:15	Yahshar 81:8
5996 s.c.	5 th	Aviv 19 th – 5 th Day	4 th Day since they Left Mitzrayim	
5997 s.c.	6 th	Aviv 20 th – 6 th Day	5 th Day since they Left Mitzrayim The men of Egypt caught up to Yisrael, most likely at the beginning of the day in the evening when Yisrael was setting up camp. Yisrael destroyed them. A few fled back to Egypt and reported to Pharaoh, who then sent out his entire army and chariots after Yisrael.	Yahshar 81:9-15
5998 s.c. Through Aviv 21 st of 5999 s.c.	7 th	Aviv 21 st 5999 – 7 th Day The Day of Final Deliverance! The Physical End of the 1290 & 2300 Days of Daniel Also the year when Yahushua Returns and will once again divide up the land of Yisrael among the 12 Tribes.	6 th Day since they Left Mitzrayim Last day of Chag Matzoth which ended when they crossed the Sea of Reeds, At which time All of Pharaohs remaining armies caught up to Yisrael at the Sea, which was 1,000,000 men according to Yahuahs Word written in Sefer Yahshar Who were then destroyed in the sea by Yahuah's hand. A shadow of the armies who come against Yahushua when He Returns, which He Destroys.	
6000 s.c. The 120 Yovel / Jubilee		Yisrael will Rest in their Cities Just as they did in the Days of Yahushua ben Nun	The Yovel – Represented by Aviv 22 nd Shabbat after Aviv 21 st when Yisrael was Delivered. The Yovel Year is a time when Yisraelite were to go back to the lands of their inheritance.	

Our Exile has ended, next comes the deliverance from Pharaoh. Then from Mitzrayim, and later from Pharaoh's armies. The complete deliverance of Yisrael will be Completed on Aviv 21st 5999 s.c.

SIGNS OF THE TIMES: A BRIEF BRIEF HIGHLIGHT

I was going to make a video about all of the things that are happening in the earth daily, and what we as Yisrael should be doing to prepare. A follow up so to speak to the **Restoration of the Scriptural Year** teaching. But I have not been able to do so, therefore I'll go over a **few** things here, as if I even attempted to cover them all I could write a 300+ page book, and continually add to it each and every day. There is so many things happening, you can't keep up with it, nor does the vast majority of it get reported on the news. The main stream media is just a hitler type propaganda machine, programming the people, just like this church system. Which hitler and this government beast system also use the church as well. The things that hitler done was nothing more than a practice run for what is here now. But they have had 66 more years to perfect hitlers strategies, and are using new technology to do things that people are not even aware is possible. If you hide what is possible, then when someone states what is really happening, people declare "*that is impossible*" because of lack of knowledge.

Along with studying Yahuahs Word and trying to get out the specific teachings He has made me understand. I have also been studying and sharing these events in the earth, and the things that this system is doing, which are the "**Signs of the Times**" for well over the last year or so. There are so many things that is on our doorstep which most people don't even know is possible. Back some months ago, a brother and his wife which we had spoken with and shared some these things with, sent me a DVD made by a man named **John Moore**. He is a former green beret and naval intelligence officer, who is trying to get out the information which he is aware of, which is some of the "natural events" which the governments of this earth know is going to happen and has been preparing for since at least the 1970's if not long before. I ordered the DVD "**Global Warming: What the Government Isn't Telling You**" with the new update disk, and it goes over some of the highlights which I had already found in my own research over the past year or so. I recommend everyone see this information, the main DVD was filmed in 2008, and some of the information which he shares, shows, or states can or will happen, has now Already Occurred since the recording! Such as the Destruction of the Gulf Stream and the Hard winters in Britain, Europe, and other countries. I don't agree with 100% on what he states is going to cause these things, but I do agree with the outcomes that he states, which confirms for me what I have found in my own research. I also don't agree with what he said about how the calendar was changed in Yahuahs Word. But for the event information, you can order a copy and share it with your mishpacha/family. Here is his website: <http://www.thelibertyman.com/>

But you can also watch at least the main DVD for free, because he released it on **YouTube**, so that everyone could get this info. It is a 12 part series, but it is worth taking the time to watch, and its **free**.

Here is the link to **Part 1**: <http://www.youtube.com/watch?v=vpbiuKTtMZo>

The rest of the parts will be listed at the end of each video or in the videos listed to the right side of the screen. **Now, as far as where to go, we must trust in Yahuah and pray that He guides us on where to go. But at the same time we must prepare and do what we can see to do. Yahuah is making this and much other information available for us to make preparations. Even when the governments try to hide it.**

By the way, **I am not telling anyone to move to missouri.** As a matter of fact, personally I would stay away from Missouri, Kansas, and Colorado, due to the large military and government industrial buildup of that entire region.

Also I do not "trust" anyone in the media or government. I am not saying that john moore is lying about anything. As a matter of fact, I already knew and had confirmed most of the information that he speaks about, long before I even knew who he was or saw his video. However, it seems to be over

the top, about how he is steering people to the missouri Ozark region. I have heard others also pointing people to go to missouri. The only way I would go there is if Yahuah told us Directly, for the reasons stated previously.

One of the things that he shows in the video, is a map of the united states which is at least very similar to the maps which have been shown to classified meetings in different branches of the military. (He comes from the navy, so his contacts are mostly in or retired from the navy.) On this map, there are large sections that have been colored in blue. The blue sections represent parts of the country that would be underwater, if there were a sudden ocean level rise. Part of his explanation differs from what I have researched out. But the end result would be the same. Just as John mentions, there is what the scientists call the "Ocean Bulge" around the equator of earth. It is literally a bulge of trillions of gallons of water that is approximately around the equator. He states that earth "rotating" keep this water in place. But from what I understand, have researched, and seen evidence of. The only force that could keep this "bulge" of water in place is Earth's Magnetic Field. From what I have found in my own research, I believe this will occur fully when the magnetic field around earth collapses. Will it be to the degree that is shown? I don't know. When will it totally collapse? I don't know, it may be toward the end of the Great Tribulation. But the magnetic field is weakening, and the poles are moving in ways that have never been seen before. There has already been evidence of this coming, with the fluctuations in the magnetic field that have happened and the ocean flooding in countries around the earth. **Here is the proposed map of the U.S. that he shows in his video:**

U.S. Map

Area's in blue are regions that may be impacted by a worldwide ocean level rise and possible tsunami events.

Now I am not saying that this is exactly what is going to happen, or that all of these areas will be underwater. Only that this map is at least very similar to the map the military branches are showing to some of their members with the required clearance level.

Remember, this would not be an event isolated to the U.S. The collapse of the magnetic field will be a worldwide event. But I have not found a global map that shows what this would look like. There may be maps which people have made, based off this information. If you have found one, please send it to me and I will look into it. But understand, no matter where on Earth you live, when the magnetic field collapses, the coast and low lying areas, like the ones shown here in the U.S. Map, will be at risk.

We also have one ex-military source which confirmed this information to us, and we didn't even show them the map. We just asked them some questions, and they told us what it looked like and what it was about, to a degree. We didn't find out anything more than what we already knew. But this person has been a personal confirmation to me that this map is at least very similar to the governments, just as John Moore states. The beast governments of this earth do believe that this is going to happen at some point. And from what I have seen, researched, and the events that are taking place, this may be coming soon. Also if you have researched the events taking place, you should also know about the bunkers, seed vaults, mass food storage, brand new fully complete "ghost" (*empty*) cities being built, and many other signs of preparation, which all the major governments around the earth have been doing for some years. They are not doing all of this work and spending all the money on these things for no reason. Whatever it is that they know about, the governments of this earth see it as a threat to their own demise, otherwise they would not have been making these preparations for so long a time. Which this is all written in the Word, such as **Yeshayahu/Isaiah 2:19** "*And they shall go into the holes of the rocks, and into the caves of the earth, for the fear of YHWH, and for the tifereth of His excellence, when He arises to shake the earth mightily."* What are these "holes of the rocks" and "caves of the earth" that the Word speak of? It is the places that the Elite have prepared for themselves over these years, for whatever threat that they see coming.

Referring to the U.S. map on the previous page, depending upon the exact circumstances of the event. This will affect all coastal areas, hundreds of miles inland, plus the entire Mississippi River Valley area, all the way up to the Great Lakes. This is similar to what would be seen in most countries around the earth. If the Magnetic Field collapses suddenly, which I honestly expect that it will at some point, the initial tsunamis that could be created would be unthinkable. They may reach further inland beyond the "Blue Flood Zone" marked on the map. I do not know for sure, and I don't think there is any way for anyone to know for sure. As the times just shortly ahead will be what is written in **Daniel 12:1** "*...and there shall be a time of trouble, such as never was since there was a nation even to that time:...*"

From all information and events that is taking place. If I lived anywhere near the coastline, no matter what part of the world, I would move at least several hundred miles inland, and at a good elevation. And I would stay out of and away from any major cities. I know this is difficult in some ways, as there are so many large cities these days, just about everywhere. If possible, the mountain wilderness type locations, with low population densities will be the best areas to go. If you live in small towns and county, away from the coast lines, you may be ok for the time being at your location, until Yahuah tells or shows you to leave. But general preparation is necessary for all Yisrael.

This is something that Kol Yisrael should be currently in constant prayer about. Where does Yahuah want us to go? We are praying about this daily, and have been for many years. But now we have arrived in these last days which we knew were coming. But it is no longer a time in the future, it is now. When Yahuah tells us where to "Go!" we will Go, we won't delay or wait, or make excuses why we can't leave yet. We will Go Quickly and Will Rejoice that we Going! For the 2nd Exodus of Yisrael is nearing. We are getting prepared now, and we expect that Yahuah will give us that direction soon. So when He tells us, we Will Go As Fast As Possible. As you Pray for this same answer, when He tells you or shows you to go, you must go quickly. Do not Delay. As this will be to protect His People who will listen to His Voice, and to Gather Yisrael in the Wilderness. Just as His Word States.

I have been telling, and posting, that people need to stop believing the government/media propaganda, and start researching things for themselves. There are so many things happening. From the suns energy increasing, to the beginning of the collapse and fluctuation of earth's magnetic field. Earth's Core is heating up, Volcanoes all around the earth rising in activity, and so much more. But let's just talk about the massive number and magnitude of earthquakes that is occurring all around the earth, and are continually increasing daily. The Mass majority of earthquakes are never reported on the news, even when they are M6.0+ or greater, which seem to be occurring on a daily basis now. Just a few days ago, there was four to five M6.0-6.9 quakes, Plus an M7.2 Quake, in only about 15 hours time, that occurred in different parts of the earth. Let alone the small quakes that are happening constantly now, which most people just brush off as nothing. But they too are important, as they are signs of plate, fault, or magma movement, which usually precedes larger events, like the Japan quake. To give you an idea, the photo on the below is a screen shot of a free program called **Earth Quake 3D**. It uses the reports from the official seismic activity reporting agencies, to display earthquake location, frequency, and magnitude. What is shown here earthquake activity in a **period of only 14 days** (early through mid sept 2011), and **only quakes greater than M2.0+**. This is what the new "normal" earthquake activity has come to look like. Each one of the epicenter circles, and correlating numbers, represents an earthquake (note that many numbers were cut off the top and bottom of the screen). **Again only showing M2.0+ or greater, and only those occurring in the past 14 days** (early through mid sept 2011):

Why is all these things happening? **Mattityahu/Matthew 24:7** "For nation shall rise against nation, and **malchut/kingdom against malchut**: and there shall be **famines**, and **pestilences**, and **earthquakes**, in **divers places**."

All of these things are taking place, and are increasing in quantity and magnitude everyday now. The Word is being Fulfilled Daily, and people don't even seem to notice! I couldn't begin to write all the things that are taking place in the earth. And that's just the things that I have found and know about, Let alone all that is not being told at all! Look at all the massive animal die offs, which everyone has seemed too forgotten about. They have **not only not stopped, but have increased in number**, even

though the media stopped reporting on them months ago. Multiple types of other natural and “natural”ly man-made disasters. One such event was the “Oil-Spill” disaster, they knew from scientific study releases back in 2008 and before, that the gulf stream was weakening. So they figured out if they introduce a massive amount of oil and other “dispersant” chemicals they could shut down/destroy the gulf stream which occurred just about 90 days or so after the “spill” occurred. Which since has been causing havoc on the climate around the earth. Then we have weather manipulation/creation causing massive storms and many other events. The massive jump in the number (900+) tornados in the southern united states, along with massive rain fall amounts, in only approx 34 days (april 1st – may 3rd 2011), which even the prognosticators/meteorologists said they couldn’t explain. Then there’s FEMA and HLS (Home Land Security) placing in and changing all kinds of laws. The same people who has control and only answer to the president for “continuity of government” **when** martial law is declared. Also the same people preparing and buying huge amounts of supplies, hundreds of thousands of coffins which hold 4 people each, underwater body bags, Billion Plus \$’s in food, hiring security officers, and much more. All of this supposedly for the New Madrid National Level “Exercise”, *(their own order request forms were available to view, although some have been removed)*, plus info from companies and other sources. This is the same thing that they have done for several past real events, (but not on this scale) of which in several cases they have slipped and even admitted they were **already in place** with **supplies already packed**, **Before** these “natural events” or “acts of terrorism” occurred in recent past “disasters”. The Mississippi river massive flooding, and the intentional and pre-planned detonations of the levees, which flooded an additional **130+ thousand acres of prime farm land** besides homes, equipment, and more. This was all noted in a **FEMA pamphlet written and released in 2009**, that levees would be blown for the **FEMA New Madrid NLE (National Level Exercise) planed for 2011**. Well this “exercise” technically began april 29th 2011 and continued through may 21st 2011. It seems that their exercise went according to plan, blown levees, dams, and all. The massive amount of water from both the rain, and the Mississippi & Ohio Rivers which called “500 year flood” created a lot of pressure on the New Madrid Fault. Then there is the massive fires in Texas and may other western and north western states. These fires have cleared out many forest areas, which wildlife like deer lived. They have now had to flee from these areas, many being killed by the fires, many others will die this winter from starvation. As the fires also burned many fields, both grasslands and crop fields. **Then there is the coming crash of the markets and collapse of the U.S. “dollar”, which is all being orchestrated and controlled. This entire system is about to come down.** They are just waiting for the right moment.

I wrote a document about nine months ago, and posted it on our network titled “**The 2nd Year of Famine in Mitzrayim**”. In that article, I spoke about how the money failed in the 2nd Year of the famine of Mitzrayim/Egypt. I explained that Yoseph’s 7 year Famine, is also a **shadow of the 7 year Tribulation**. We are now in the 2nd Year of the Tribulation at the time of this update, and we are seeing this take place. As has been seen over the past several weeks just in the roman month of august, the advancement and acceleration of the US dollar and Euro downfall is underway. This is being used to bring down all the markets and countries around the world. To prepare the nations/people for the plans of the one world global currency, which in part has already been proposed to the IMF by china and others. At least that is their plan, if it ever gets that far who knows but Yahuah. I do know that at some point they Will lose control of their “controlled collapse” that they have publicly stated they wanted, and are now causing. When they lose control, the entire system will crash and this Bavel/Babylonian system will be destroyed just as it is written.

I also spoke about the Global Famine, again a shadow of Yoseph's 7 Year famine in Egypt. This is also the 2nd year of the Global Famine that is currently taking place, but most people don't even know it or they don't believe it! Besides the crop destruction by many different means in china, russia, britan, australia, india, somalia http://articles.cnn.com/2011-09-05/world/somalia.famine.report_1_luca-alinovi-somalia-middle-shabelle?s=PM:WORLD and many other countries, including the major crop & grain producing countries.

Let's just talk about the US for a moment. Last year crops production was lacking, but this year there has been massive wide spread crop destruction. By fires, floods, droughts, and other, much of it caused by man even though most don't realize this. And the crops that did manage to come in, from what I have seen personally and heard about, they are small and immature, mostly due to the severe lack of rain during the height of the growing season. Yet people don't believe there is a famine, because they can still go to the grocery store and buy what they want. **Thank Yahuah that we still can, as Yisrael still needs to be making the final preparations!** But I guarantee one thing, the destruction of the crops will catch up, and it maybe sooner rather than later. And next year will be worse than this year has been.

We spoke with a close brother in Yahuah back a few days ago, not sure if he wants me to mention his name here. He lives in Canada's grain belt. He has been trying to store up wheat and other items for him and his family for a while now. And he told us about how hard it was to find farmers who would actually sell him a few buckets of wheat, because they have not had a crop for the **last two years!** The grain he is able to get from here and there, is **three years old**. That means this year and last year, yes the first two years of tribulation, there hasn't been a real harvestable crop in the **grain belt, which is the bread basket of Canada**. He has had to go all over to different farms, just to try to find enough grain to store up for him and his family. Farmers make their money selling their crop, yet they don't want to sell their grain because it is all the grain and seed they have. That should tell us something.

If you take the state of the **monetary system**, and the inflation that is coming, which they have already began to speak about on the news before I could even get this update done. And then add in the **wide spread worldwide crop destruction** that has happened **this year and last year**, which is causing a food shortage that will be very evident soon everywhere. **Both of these factors combined will cause food prices to skyrocket**. Things are accelerating at a **fast pace**, and could rapidly speed up this fall. Which is when the US debt crisis "cut" dates are scheduled to be done by the new "super congress". Which is scheduled right around the **same time** that the harvest crop numbers will be coming in. They are moving forward with their plans as fast as possible now. They have created the problems, now they are beginning to get a reaction from the people to fix it, although the problems will get much worse yet. Eventually when they think it is time they will begin to try to implement their new world order solution. Which they have point blank stated many times on news broadcast, presidential speeches, and more here and other countries leaders abroad, which is already in progress in varying degrees.

There is a one website which attempts to find and keep track of all the news articles, videos, reports, and more, about the events that is taking place all around the earth in these last days. They have a whole list of different subject categories ranging from Animal deaths, earthquake and volcanic activity, to financial events, society collapse, and much much more. It is updated daily with current events, and you can view "older" posts by clicking on the "view older posts" link at the bottom of the page to view previous days articles. Their link is: <http://thecomingcrisis.blogspot.com/>

!!IMPORTANT!! We are living in perilous times. Most people have no idea, and want to deny, just how evil and wicked this beast system is. And most people are completely reliant upon this beast system, just as this system has “programmed” them to be. And when the multiple catastrophes hit in a very near future, people will turn to the government for help. **WHATEVER YOU DO, WHEN THESE THINGS HIT, DO NOT TURN TO THIS SYSTEM FOR THE ANSWER. DO NOT GO TO THE FEMA CAMPS OR “RESIDENTIAL CENTERS”** as they call them, which have been built literally all over the country. As they are nothing more than modern day massive concentration camps with railways and all, so “great and advanced” hitler would be proud. **DO NOT** go to the stadiums which will be used as staging points and round up areas, they have been practicing and training in stadiums around the country already. **Simply Do Not go to any other area where they try to get people to come to, like walmarts.**

We must rely upon Yahuah First and Foremost, He is Our Only Refuge & Protection. But also you must be prepared, just as Yisrael prepared when they believed Yahuah to deliver them from Mitzrayim/Egypt. Get Prepared Now while we still are able!

WHAT DO WE NEED TO GET PREPARED?

A question which I have been asked many times now, What do we need to get Prepared for what is coming? Well this covers a lot of things. First and foremost we need to know and understand the Restoration Truths of Yahuahs Word, AND we **Must be Doing Them!** People need to grow up and stand on Yahuahs Word! Not the opinions and ideas of men! To Love Yahuah is to Be Obedient to His Word, not men! – **Yochanan/John 14:15 & 21.** **If we continue to break His Commands, then we are not being Obedient! We CAN NOT Compromise for Anyone or Any Reason.** Compromising on Truth for the sake of a false “unity” is Not from Yahuah, it is from s.a.tan! And Yahuah does not give several “options” on how or in what way we would like to “keep” a Command. There is only one way and one path of the straight and narrow, **HIS WAY!** He Commands that we are Obedient, if we are not being Obedient, then we are in rebellion, and rebellion is as the sin of witch craft, plain and simple – **Schmuel Alef/1st Samuel 15:23.** We don’t have time to be playing games! **If we are trying to please men, then it will only lead to destruction.** This may sound blunt, but there has **never** been time to play around, **let alone now in these last days!** We are in the 2nd Year of Tribulation! How much closer to the destruction and judgment of the nations (*which has already begun*) do people have to be, before they are willing to serve Yahuah Fully?? **Grow Up Yisrael! If you cannot drink simple Milk, then how can you eat the Meat of Yahuahs Word??!** **Stand Upon the Truth of Yahuahs Word, and let No Man’s opinions and false teachings sway you!**

SHOULD WE AS YISRAEL PREPARE PHYSICALLY?

Yahuah is Our Only Protection and He will Provide all our Needs IF we obey Him. But does this mean that we should just say *“Well He’ll do it all for us, we just have to sit back and wait, and He’ll rescue us and just pick us up and carry us out like He did Lot.”* Like my Brother Kalev has stated, **NO! You Don’t want to be like LOT!!!** **You should know to stay out of the sin like Avraham!** He didn’t get himself into a place of sin like Lot did. Plus if a person would understand, **Lot lost everything he had, even his wife** because of his decision to turn to what he thought was “greener pasture” which looked pleasant and much easier work. Rather than Avraham who understood to do what Yahuah wanted him to do, and he was prepared by his walk with Yahuah, and his physical assets.

Get Prepared the best that you possibly can! Yahuah is telling and revealing to His People Kol Remnant Yisrael the Day and Hour in which we live by His Word and the Signs of the Times, so that His People can Prepare! When Yisrael was in Mitzrayim/Egypt on Aviv 14th, they prepared unleavened bread, got their animals, carts, wagons (*which they built for the exodus*) and everything else ready, because they were in a hurry to leave! Remember they had been there from the time that Ya'akov/Jacob and his household had entered Mitzrayim to that day, which was 210 years (*Yes I can prove it from the Word, along with the verses about the 430 & 400 years*). Egypt was all that generation knew. They had to go from built houses back to moving tents, leaving everything else they could not carry behind. **But they believed Yahuah would deliver them, so they prepared to be delivered!** So if we believe that Yahuah is going to deliver us, should we not also prepare?

Ya'akov/James 2:17 "Even so Emunah/Faith, if it has not Mitzvoth/Obedient Works, is dead, being alone. 18 Yes, a man may say, You have Emunah/Faith, and I have Mitzvoth/Obedient Works: show me your Emunah/Faith without your Mitzvoth/Obedient Works, and **I will show you my Emunah/Faith by my Mitzvoth/Obedient Works."**

I know many people think that this is outrageous (*putting it politely*), but I am giving you the information from Yahuah's Word. It is Written. **Plus you should be searching it out for yourself.** Do we think we are better than the members of Yisrael who fled into the wilderness from Mitzrayim? **Do we not understand what the Word states about these last days, that we will have to flee into the wilderness??** And the only place of protection is in the wilderness where Yahuah prepares a place for His People, just as He did for Yisrael during the 1st Exodus? – **Gilyahna/Revelation 12:6** Do we not understand that this beast system, which is Mitzrayim/Egypt & Bavel/Babylon, is going to be destroyed very soon as it is written in Yahuah's Word? It has already begun, and much larger scale events are literally on our doorstep, that will come in the forms of Major never before seen Earthquakes, nuclear weapon detonation, terror attacks, massive ocean flooding/tsunami's, and more. When these things begin to hit, it will be one right after another. **Look at Japan, just in one day** they had a **major destructive earthquake, tsunami, volcano, and nuclear plant radiation**, let alone all the events that has continued there daily since march 11th. This is just one of many examples going on in the earth now, and it is nothing compared to what is about to occur. We must be ready in all ways that we are able, and we must prepare for these things **NOW** as you will not be able to make preparations once these things hit simply because the resources will not be available. **If something as simple as the prognostication/prediction of a snow storm can wipe out supplies and food from stores, what do you think will happen when a major catastrophe hits?**

CAN'T WE JUST GRAB WHAT WE NEED WHEN WE LEAVE?

There are many things which have to be considered when thinking about needed preparations. Most people today do not have a working understanding of what is even needed to survive in the wilderness. Even when people think of camping, most have the idea of a motor home or camper trailer "mini house" sitting out by a lake in the woods. But if we have to do (and we will) what is written in:

Mattityahu/Matthew 24:15 "When you therefore shall see the abomination of desolation, spoken of by Daniyel the navi, standing in the Beit HaMikdash, (*whoever reads, let him understand*); 16 Then let them who are in Yahudah **flee into the mountains:** Let him who is on the housetop not come down to take anything out of his bayit: 18 Neither let him who is in the field return back to take his clothes. 19 And woe to

them that are with child, and to them that are nursing children in those days! 20 But make tefillah that your flight is not in the winter, neither on the Shabbat: 21 For then shall be Great Tribulation, such as was not since the beginning of the olam hazeh to this time, no, nor ever shall be. 22 And except those days are shortened, there should no flesh survive: but for the elect and for the sake of those chosen, those days shall be shortened."

Ok, several points should be made here. **One:** Yes I understand this is speaking of the last 3 ½ years, The Great Tribulation But understand that the **last 3 ½ years Great Tribulation** is exactly to the day **only 2 years away from the time of this update.** **Second:** Yes I understand that this speaks of those in the city or place of Yahudah. **But is the city of Yahudah the only place that will see destruction? No.** Think of these verses like this, what about the people in Japan when the tsunami came in and they were running for their lives because they waited after the earthquake trying to gather things together. Or how about even more recent, the southern united states where over 300+ confirmed tornados in one storm, killed at least 328+ people. In particular Tuscaloosa Alabama when a mile wide super tornado hit and left the town in ruins. **Did those people have time to go and get what they needed when they saw those tornados?** Let me answer that: At the end of the Aviv 22nd Shabbat services, at the very moment we ended services inside our home at around 9:30 pm, the very moment we dismissed. We heard a sound like a freight train and we could hear the winds just suddenly hit the trailer and blowing debris outside. My Abba/Dad, Eema/Mom, and I all knew what it was as we had been near two other tornados in years past. All the congregation ran down the hall, through the back room, into the garage, and down into our cellar. I grabbed my backpack with a couple other supplies, and told another brother to grab a case of food and we took that with us. We believed and prayed that Yahuah would protect us, and He did. But since I had things ready, I grabbed them and took them with me. At least it would be a help if they were needed. When the winds seemed to be dying down, myself and the men who were standing in the garage began to go back through the trailer and procure flashlights and such as the power was out for the next several hours. It came to my mind about the 40' x 20' tent which we had the Pesach Services under. I took a light and opened the front door to find that it was destroyed, as you can see in this photo to the right that I took the next morning. Steel poles were bent and broken, bungee cords snapped, and some of the two foot rebar steel stakes had been ripped up and bent in the ground. When I saw the tent, the next thing that came to my mind was that it had served its purpose and we wouldn't need it anymore. Even though the tent was only few feet from our trailer, and a pole could have easily been sent through the wall, our trailer was not touched or harmed in anyway.

The only other thing touched on our entire property was the Pesach sign at the road. The sign itself was not hurt, but the wind was so strong it bent/broke the steel poles off at the base. When Yahuah hides His People, no one else is going to know where they are hidden, it will not be advertised. Our next door neighbor to the left of us has some roof damage, his tv antenna tower was taken down, and several trees and large tree limbs were broken down. The neighbor to the right of us had their garage door blown in, and a few other things. The next neighbor down from them

had two large evergreen trees broken clean through at almost ground level. The news later confirmed what we already knew, it was a tornado EF2, but it went up over us through the air. Although it did touchdown in another small town not too far away.

In short, as it is written in **Mattityahu/Matthew 24:15**, when these catastrophes hit, you will not have time to be getting prepared after the event. **Remember the 5 foolish virgins waited until the alarm went out before they wanted oil, but it was already too late. We cannot think like that, we must be pro-active, and get prepared before these things happen. Not re-active in trying to no avail afterward.** So that we are prepared for when Yahuah tells us to “Go!” that we will go with haste, so as to escapes the destruction that is coming. Not being caught in it along with the rest of the masses.

ELECTRICITY, FUEL, AND OTHER RESOURCE DEPENDENCIES

Something to be aware of, if an event takes out power or even just communications to gas stations, you will not be able to get any fuel. As it takes **both power and communication** to allow the “modern” fuel pumps to work. So once you run out of gas your vehicle is done, and that is if the highways are not at a standstill with all the people who are also trying to escape your area, town, or city. So you cannot rely upon a vehicle **solely** for escape. **But if Yahuah tells you to “Go” before the event takes place, and you leave, or if you can store and carry a good supply of additional fuel, your vehicle will be a great asset if properly prepared.** I’ll talk more about vehicle related preparation later.

Besides no gas pumps, if there is no power or communications, then store computers also will not work, and they cannot run their registers nor debit/credit card readers. Even if there is only no communications, most “modern” computer registers will not be able to function period, due to not being able to communicate with the central network. I have seen this personally in the places that I have worked for in the past. So in that case even cash will not be any help. Once people begin to feel pressured for resources in the following hours after a disaster, riots will break out, the stores food will be gone in hours, shelves emptied. Cities will be the worst place to be, as once the stores are emptied, gangs of people will begin to go from house to house searching for resources by any means necessary. Don’t think this can happen? It has happened many times in the past during disasters or even during civil unrest, like what happening in Britain recently. What would you do if your children and family are going hungry or worse? **This is one reason to be getting out of the cities now while you are still able.** Do not expect the government to help you, you’re kidding yourself. As more events happen, they will busy just trying to hang onto their bunkers to save their own hide. They will hide in the rocks and holes that they have prepared, just as the Word Teaches.

SO WHAT SHOULD EVERYONE BE PREPARING?

There are so many things that could be covered here, but ultimately it comes down to your individual situation and what you are capable of doing physically and financially.

I truly believe that we will be Healed and the Strength of Yisrael Restored as He gave it to the son’s of Ya’akov. Just as Yahuah did just before the 1st Exodus written in **Tehillim/Psalms 105:37** & when Yahuah healed Yisrael again during the days of Hizqiyahu when the remnant returned to Him to keep Pesach **Divre Hayamim Bet/2nd Chronicles 30:18-20.**

I also understand that most people are having a hard time financially, what the governments of this earth calls “money” is nothing more than a **control mechanism** to keep the slaves under their thumb. **For Example:** If you don’t want people to travel, you don’t have to make a law, just raise the price of fuel to the point that people cannot afford to travel. I’m sure everyone has been feeling this. The elites and the taskmasters with plenty of this “monopoly money” and “computer credits” are not affected, just the common slaves, struggling for their daily bread.

But with that being said, we must all prepare the best that we are possibly able. If we do that, Yahuah will make the increase to provide our needs. **If you have not as of yet made little or no preparation, right now is the time.** Sometimes we must figure out what we really don’t need, like that big screen propaganda tube (aka tv), or that 2nd car, stuff stored in the garage, etc. Whatever we can get rid of **quickly** to make the necessary preparations, as all this “stuff” we will have to leave behind anyway. **So prepare what you are able, just do it as quickly as possible.** Get whatever supplies you are able from any sources possible, whether it be local stores or on the internet. **Remember** you will also have to get, not only what you need, but also what your family needs. The needs of children, especially younger children, will have to be thought out ahead of time. **The need for all of this preparation is imminent, and the hour is late. Will it literally be tomorrow, I don’t think so. But it is shortly ahead, and it takes much more time than what most people think to get prepared. It is not something you can do overnight. Don’t expect to wait until the last minute and have anything you need, it’s not going to happen. Even now, some supplies are on short supply and are getting harder to find all the time. Many secular people are even preparing for events that are coming, they just don’t understand the Scriptural side of it.**

No matter where you are, there are some general needs that every person should be thinking about when trying to make preparations. Again we have been brought up in a society in which we no longer really understand how to live off the land. There are some great resources to gain knowledge of how to do things, ideas or products, product reviews, and at least gain a working head knowledge of skills. YouTube is a great resource to find people sharing and even demonstrating skills, like all the different ways to start a fire, build a shelter, purify water, etc. Also survival topics and tools, reviews of products, and more, helps tremendously and can help keep you from wasting money on an product or tool which is junk. It can also be a great guide on what tool or product to select and/or how to use it. Another resource is to just “google” it, you can find many different survival websites which talk about and speak on many different products and topics.

For once tv can actually be of some help. There are few shows out there that really cover this type of topic, but one that I have personally found to be helpful and interesting is the “**Survivor Man**” series. If you have a way to record (vcr, dvr, ti-vo, etc) this show do so now, and save them. That way you can watch them over and over, or share them to someone else. If not, you may be able to rent them from your local video rental (blockbuster, family video, etc) or maybe even find them available for purchase. Now we as Yisrael can’t eat unclean things as he does, but Les Stroud (Survivor Man) demonstrates a lot of different scenarios, and more importantly many different **skills**.

Also at the original writing of this document, I have added an additional Page called “**Preparing to Flee**” to our **Restoration of All Things Network** - <http://RestorationOfYisrael.ning.com> There we can share information, links, topics, ideas, questions, and more. A link to this document will also be posted there so you can download and/or send it to someone else.

BE PREPARED "GRAB & GO" SURVIVAL PACK: BASIC ESSENTIALS

First Essential: VERY GOOD BOOTS

- Need to be Water Proof
- Tread needs to be for All Types of Terrain
- REMEMBER: Leather must Not made of pig skin to keep the Command in Wayiqra/Leviticus 11:7-8

* Remember this when purchasing any leather products. I personally try to stay away from most leather products, unless I know for sure that they are not pig skin.

I Recommend **BELLEVILLE MILITARY BOOTS** as this Company **Only** Uses Top Grain **Cow Hide** in all their boot models, they **DO NOT** contain **Any Pig Skin** what so ever. They have this listed in an Company Overview Boot Model PDF Pamphlet and I also contacted them directly and in which they verified this. Link for the PDF: <https://www.bellevilleshoe.com/pdf/2010BelleCat.pdf>

I searched for several months to find a verifiable "clean" boot, but I am not saying this is the only company, just the one that I found and have been able to verify.

THINGS TO KEEP IN MIND WHEN SELECTING A BOOT:

TEMPERATURE CHANGES THROUGHOUT THE YEAR: Most boots are designed to meet very specific needs. There are many different situations which affects the material that is put into a boot. Let's just keep to the basics: **Cold Weather, Hot Weather, & Water Permeability.**

COLD WEATHER: Designs for Cold Weather are usually insulated and sealed.

HOT WEATHER: Designs for Hot Weather are thin walled and breathable.

WATER: Designs made to withstand water are usually sealed, which means they may have limited breathability. Water Anti-Permeability features may be included in either Hot or Cold weather designs.

DURABLE SOLE: A durable long lasting but good traction sole is going to be important in a boot selection. One of the best soles that I know of in a military boot is what is called a Vibram Sole. They have very good traction (slip and oil resistant) and from the reviews I have read from military personnel, they have a long life. And with these boots which I now own, they are also very comfortable and of good quality.

In short, usually if a person needs to wear boots year around, two pair would be required. One for hot weather, and one for cold weather. But in a survival situation, you don't really want to have to carry the extra weight of a 2nd pair of boots. So if you want to try to stick with only one pair, you will need a boot that can deal not only with Hot summer temperatures but also Cold winter temps. The Belleville ICW (Intermediate Cold/Wet) Boots, although not perfect, gives the best range for one pair of Boots.

Instead of ordering the boots directly from Belleville Company, to save quite a few \$\$\$'s, I also suggest to buy these boots from eBay or other online stores. The military surplus company on eBay which I purchased my Belleville Boots from is Allegheny Surplus Outlet, the link to their eBay store is: <http://stores.ebay.com/alleghenysurplusoutlet>

They also have a website, the link for their site is: <http://www.alleghenywholesale.com/>
My boots costs about \$50 including shipping from their eBay Store. Retail these same boots would have cost approx \$170 from what I found. So the difference can be substantial. This is not the only company with sells these boots, just the one who I found with my size. So you might look around a bit on eBay and other websites.

Update: I have found another supplier on eBay, they only have an ad for a few of the Belleville Boots, but I found out that they actually stock most sizes. So we have been able to get several more pairs of the Belleville ICW boots. You may have to contact them to find your size, you can message them and ask specifically for **Belleville ICW Boots** in your size. They seem to be a little slow in responding sometimes, but they do have good prices on Brand New Belleville ICW Boots

Their eBay ID is: **xrs3000**

And here is a link to their eBay store: <http://stores.ebay.com/2008surpluscenter>

(END UPDATE)

Next Essential Gear: Back-Pack

- **Military Back-Pack Built on Frame for Support & Long Distance Travel**
- **Pack Needs Attachment points, or use bungee cords to attach other gear**
- **If a military back-pack is not available, any backpack is better than none. As a person can only carry a duffel bag (or similar) for a short while before your hands will be aching and fatigued.**

A Good Pack is going to be a crucial piece of gear, as it may contain all of you resources. There are many hiking and outdoorsmen packs available. If you have the funds, most large chain sporting goods stores carry a good selection. But if you are looking for value, there are some other options as well. General Features to look for in a pack, to be capable of long distance and/or long term use:

- **METAL FRAME** – A Metal Frame is vital to a good pack. It will give you the ability to carry more, and it will make it more comfortable to carry. Plastic frames (including plastic military frames) could possibly crack or break. A metal frame can take more wear and tear, drop, or hit, and still be fine in most situations. If you get a Metal Frame, such as an A.L.I.C.E. Pack Frame, just make sure all rivets and connections are in good condition. If a rivet looks worn or bent, replace with a new rivet or bolt. A metal frame is good, but it is not indestructible, they can bend and or other.
- **SIZE** – the amount your pack can hold is very important. As if you are in a survival situation, your pack will contain all of your supplies and immediate resources. The pack needs to be large enough to carry your clothes and supplies. Yet you can only pack as much supplies as you are able to carry. If you pack more weight than you can carry when traveling hours at a time, then you must figure out what can be replaced with lighter weight materials to reduce the total weight.
- **WATER REPELLENT** – If the contents of your back pack get soak and wet, first they will be un-useable until dry. Second, if clothes become wet, they will get very heavy. If your pack is or is not water resistant, adding a water Proof liner for at least your clothes is always recommended. A military wet weather laundry bag for instance, or a heavy duty trash bag.
- **ABILITY TO ATTACH** – Your pack should have the ability to attach additional pouches, tools, and other items. This gives you the ability to expand the capacity of your pack by using the exterior.

There are many different kinds of packs available today which have frames. You can find some good Hiking packs at sporting goods and camping supply stores. Although these may cost more for a good size pack. If you cannot get anything else, even a basic backpack from walmart is better than nothing, as at least you won't have to carry it in your hands. If you have an army surplus, or you can order online quickly. I personally recommend a Military A.L.I.C.E. Pack (All-Purpose Lightweight Individual Carrying Equipment). They are one of the best packs for the money. Mine cost about \$50 including shipping for a New/Like New

Pack complete with Enhanced Straps. **ALICE packs comes in two sizes, medium and large.** I personally recommend the large, as it has a sizeable main inside compartment. I think they both have 3 large outside pouches and 3 small outside pouches.

Whether you get medium or large pack depends on how much you can carry. Obviously the large pack is going to give you more space. Plus if you get a large, and can't carry the weight of a full load, you're still Ok. Just pack what you can carry, and you will just have extra room to get stuff in and out of your pack. Also remember clothes are somewhat light, but bulky and can take up a lot of room. If you get a medium pack, then you are more limited on what you can carry. If you have a son or daughter who is big enough to carry a backpack, a medium pack may be useful. Or if nothing else a school backpack would at least give them the ability to carry some clothes or other essentials, leaving the parent the ability to carry other items.

THINGS TO CONSIDER ABOUT THE ALICE PACK: Although the ALICE Pack system is a good base, there are a couple of things to take note that can be added to it, to make it even better:

- First the original straps, although strong, they are not that comfortable. I would recommend getting the newer enhanced ALICE straps which have more foam padding and are longer. The original strap padding is only 3 inches by 8 inches. The new enhanced straps are 4 inches by 14 inches. You can find many ALICE packs with the enhanced straps already, **but you have to pay close attention and make sure they are included.** The enhanced straps usually come in a "woodland camo" color. Another option is the one I chose; you can replace the ALICE Straps with the M.O.L.L.E Straps. MOLLE is a different type of Military pack, but its Shoulder Straps and 'Kidney' belt will attach to an ALICE Pack Frame. Both have more padding and are more comfortable. And they are a big upgrade from the original basic straps. Surplus stores may be a little high on these. I was able to get mine off eBay for a good price. ***If you purchase the MOLLE straps, make sure they come with all needed connecting (quick disconnect) straps to fasten them to the frame.**
- The ALICE pack system does not have a Sleeper bag attached to the bottom of the pack. This means either you must pack it inside the pack, or use some kind of waterproof bag like a waterproof-laundry bag, which costs about \$3, and strap it to the pack. There are attachment points on the bottom of the frame that you can use. You will need either a sleeping bag or some

other kind of sleep materials. You can add a MSS (Modular Sleep System) which is a self contained water proof sleeping bag type system, which can range from \$50 - \$400. Or you can add any kind of waterproof bag and attach it to the bottom of the ALICE Pack frame. If you can't find a waterproof bag, then just use what you can find and line it with a trash bag. Then you can put your own sleeping materials in this bag to keep them compact and dry.

- A Rain bag, also called a waterproof-laundry bag, is large enough to fill the main internal compartment and is a great addition to make. This adds an extra water proof barrier to ensure that all of your clothing and supplies stay dry. A trash bag can also be used as a 1st or 2nd layer of water protection.

As mentioned before, YouTube is a great resource to find ideas and "How To..." type videos. There are a lot of people out there who show techniques, ideas, and tutorials on many different survival topics. Use this resource it is **free** and the more knowledge you can gain now, the better, as this will all help you later on when you need it. If you are trying to figure out something, like how to attach your rifle to your Alice pack, go on YouTube type in "Alice Pack attach rifle" and you will come up with a list of videos. Watch several, as different people will have different ideas and techniques. I personally have decided to get a spectra 3 point rifle sling instead attaching the rifle to my pack, which I found out about on a YouTube video.

Below is just a couple general YouTube examples, just run a search on ALICE pack or survival, ... etc. and you will come up with a lot of good information.

One YouTube videos I found is what a fully loaded Large ALICE Pack plus supplies might look like: <http://www.youtube.com/watch?v=jeECYZxkcYE>

Another good YouTube video I found is posted by a guy who goes by Sargefaria. He shows his extended stay ALICE Pack, and some of the supplies that he carries:

Part 1 <http://www.youtube.com/watch?v=HQ9uD9aa2OM&NR=1>

Part 2 <http://www.youtube.com/watch?v=d5gTjr-AABY&feature=related>

Now that we have covered your basic gear backpacks & boots, Let's begin to talk about essential supplies. This list given here is in no way a complete or exact list. But again this is things that I have come up with and am including it here to help give you ideas of what is needed. Hopefully you have already made some preparations, and these might just give you ideas of something else you might like to add or change. Also there are many items, like shovels for instance, which only one or two people would have these items out of a entire group, every individual does not need to have every item. Weight is an issue, so some of these items must be distributed among several people.

FIREARMS

HANDGUNS

Every man and women needs to have at least a **pistol**. This is a **bare essential minimum!** When this hits, there will be chaos, and Yisrael will have to defend themselves just as they did in the 1st Exodus (Read the Scroll of Yahshar/Jasher) It should be a clip fed gun if possible with a **common type round**, as you will only be able to carry so much ammo, so you will need a common round that you can find or trade for. There are several common pistols which you can consider, but this is by no means the only pistols one can use, just a couple examples. The 9mm, though some argue it doesn't have enough "knock down" power, it will do the job. Although it might take a few more rounds, especially if it is a strong animal. A good brand 9mm, like Ruger, is a reliably weapon that anyone can shoot. A 45 acp (aka 45 auto) is another good handgun, but some say it has too strong of a recoil or kick back. But it has a larger, heavier, bullet, which delivers a much stronger hit to the target. Which usually translates into less rounds and less time needed to drop a target. A good balanced gun, like the Springfield XD Tactical 45 acp, will reduce the amount of perceived recoil, and with practice any one can use it accurately. Another option is a .22 cal pistol. Though a .22 cal round is small, it is a rifle round so it does have reach. Another plus on the .22 cal. the round is very small in size, so you can carry a larger quantity than what you might on other guns. But remember, it may take a good number of rounds and time to drop a target, especially if it is a larger target like a bear or cougar. If you are being rushed by a bear, it may not have enough power to kill the bear fast enough, especially before the bear can come into physical contact with you other family member during an attack.

There are plenty of other handguns available, this is just a couple of my suggestions. **The most important rule when getting a weapon is to get something you are comfortable with. Practice with them to get used to how your guns handle, and to improve your targeting skills. Also practice on reloading speed, not only magazine/clip changes, but also on reloading your clips, and reloading your rifles. For your clip fed guns, you should have a bare minimum 4 clips per gun. If you gun/clip only holds 9 rounds or less, 5 clips would be better. I would recommend 6 clips per gun if possible. That way if a clip was lost, broke, or malfunctioned, you have an additional. Also remember to keep your weapons clean, so they will stay in good condition. And remember to disassemble your magazines/clips once in a while and clean them as well. One good website that I use for all gun related needs is www.midwayusa.com Also use YouTube or Google for Cleaning or disassembly info and videos.**

One another note: In today society, we have been told that "children" should never handle guns. However, 40-50 years ago, it was common for a 7-9 year old to know how to handle and use a .22 cal rifle to hunt with. It is all about teaching safety and responsibility to your children. I am not saying that you should give your 7 year old a pistol or rifle and just let them go with it. But you can teach them firearm safety and dangers, and when they/you are ready, allow them to use it under your supervision. Take them with you when you go hunting, let them see what a gun does. When they see it kill a deer or other animal, they will see and you can tell them, that is why a gun can be dangerous. You only point it at what you intend to kill. And if used correctly, it is a good tool. Take them with you when you go target practicing, let them see how you handle and use a firearm. Then when you think they are ready, let them target practice with your supervision, using a .22 rifle. It has a light kick, and is easy to aim. If you don't yet feel comfortable with teaching

them with a gun, consider a youth bow. But make them understand, it can also be dangerous if not used safely. There may even be training courses at your local gun range for youth. They need to be familiar with these things, so they grow up with an understanding and ability to use them if and when it is needed. As when these things hit, they need to know how to defend themselves.

RIFLES & SHOTGUNS

At least several people in a group need either a good rifle or a good shotgun for several reasons. One reason is hunting, a shotgun or rifle is a necessity for taking down larger/faster game at distance. Such as clean birds, deer, turkey, and more.

SHOTGUNS

A shotgun is a great hunting tool, and even a good close quarters/close distance defensive weapon. The **12 gauge shotgun** is the most common shotgun in existence. And the **12 gauge ammo**, which is available in different load types, is also the most common shotgun round. A **12 gauge shotgun** that can shoot both **3 inch** and **2 ¾ inch rounds**, would give you more flexibility. A shotgun is going to be limited to the load type that you use with it. It takes the correct load type to get a desired result. For instance if you are hunting a deer, and one is standing 50 - 100 yards away, you would have to use slugs. As the other types of ammo will not reach the deer, or if they do reach the target at that distance, it may not kill the deer, or take a long time for the deer to die. Which the longer it lives, the further it can run away, and the longer it will take you to find it and the further you will have to carry it back. For small birds, like quail, you need birdshot rounds. As buckshot or slugs would make it difficult to even hit a small target like quail, and even if you did there may not be much left. Turkey technically could be killed with slugs or even buckshot. But rounds specifically for turkey, turkey-shot, is best. Buckshot could be used for killing deer at closer distance, but is mostly a close-quarters/close distance defensive round. **Remember, right now you can buy any kind or type of ammo you want to use. But when these things happen, and you use some of your ammo, you may have to improvise and hunt with different ammo types that you usually wouldn't use.**

RIFLES

A rifle also gives you a larger more powerful round that will reach a target accurately at distance, something a hand gun and even shotgun's are lacking. It too can be used for hunting larger game like deer or turkey. When selecting a rifle, again remember it should be a **common round** that will still be around. You must think about what will be the most common round available, not so much right now, but when and after these events occur. One thing to think about is the muslims who are bringing weapons across the border of mexico literally by the truckload. (*What you didn't hear about that on the news? Go research the couple weapon caches the mexican military/police were able to stop. But the US news never said a word about. Now you know why they don't want to close the boarder.*) When this all hits, the muslims will come out of the wood work everywhere. They have known combat training camps all across the US, one news station found, filmed, and reported it. But this government wants them to be here, so nothing was done and they are free to operate. Anyway, most of what they are bringing over the border is AK-47's from overseas. The AK-47 fires a 7.62 x 39mm round. This is and will become one of the most common rounds in the US. If you want to take advantage of this knowledge, you would have to get a good buy on an "AK Type" weapon, as you can't but the real

thing as they are a fully automatic weapon which is currently illegal in the US, unless you buy a specific “stamp” or license. However, an SKS rifle also fires the 7.62 x 39mm round. The SKS is also more accurate than the AK. If you want to improve on the older design, you can also modify and update a SKS to bring it up to modern specs which will allow it to work with scopes and tactical accessories. The easiest upgrade is the Tapco Stocks and removable Clips. There is also a variant of the AR-15 which also uses the 7.62 x 39mm round. But the AR-15 is usually more expensive, but it is a more modern weapon. Again there are plenty of different rifles out there, use what you like, just keep in mind about the type of ammo.

In any case, get something that fits you, and get comfortable firing, loading, breaking down and cleaning your weapons. You need to have this knowledge now, as you don't want to have to learn this on the fly after the fact.

BOWS & CROSSBOWS

Bows and Crossbows are also very good important tools for hunting. They are a silent, ranged weapon, with re-usable ammo, so long as you don't break or lose the arrow. With this method, you do not alert surrounding wildlife, or other people, to your presence. But they are more bulky to carry. **If you have a vehicle to carry supplies, this is not a problem.** But when you will have to carry it on your back for long distances, size and weight will be a concern. So keep this in mind.

THE FOUR MAIN SURVIVAL NEEDS

For each individual there is Four main necessities that must be taken into consideration: **Food, Water, Shelter, & Fire** – Depending on your situation, the priority of these will change. For instance if you are in a location where it is about to rain or storm, your number one priority will be shelter. If you are in the heat of the summer, your number one priority might be water. But no matter where you are, at some point you will need the ability to cover all four of these basic needs.

When possible, you need multiple ways to fill these basic needs in case one way fails, or if an item is lost or broken, you have a back-up already in place.

Remember, if you want more information about the items I mention below, it is as easy as going over to YouTube and typing in the item name. That way you can not only find real people reviews, but also demonstrations. If you can't find the info you want there, then just “Google” it. I will list some of the best website links that I have found for these supplies, at the end of this document.

FIRE

Before you even begin to think about starting a fire, you must have all of your firewood and tinder materials gathered and ready. I have heard many survival experts state, *“Once you get your fire wood gathered, go back out and gather 5 times more than you think you need.”* This is a very good rule of thumb, especially if you are trying to get through the night. You don't want to have to be stumbling around in middle of the woods at night trying to find more fire wood.

Although butane lighters or a pack of matches is an easy way to start a fire, they have one major flaw, **They run out**. You must have additional fire making resources that will last much longer. **Magnesium Sticks** is a very easy to use, compact, and readily available fire starter, that works wet or dry. You can pick them up in sporting goods stores, some tool companies, and even in the camping section at wal-mart. You simply take a knife or something else metal, and scrape off some of the magnesium onto your tinder bundle, making a very small pile of dust and shavings. Then you flip the magnesium stick over to the other side which has the striker. Position the end of the striker close to your pile of magnesium dust. Then take the back side of the knives blade and scrape down the striker, this causes sparks which ignites the small pile of magnesium which burns around 5400 degrees Fahrenheit, which will ignite your tinder. *Note: Make sure to scrape the paint off the striker when its new, otherwise you will not get any sparks.*

Another **Reusable fire starter** is a **Magnifying Glass***. What is great about using a magnifying glass, is **that it never runs out of fuel**, that is so long as you have full sunlight at the time. Using a magnifying glass to start a fire does take a little practice, which you can do anywhere you have sunlight. But it is a great resource in the fact that if you need a fire, and the sun is out, **you can use the magnifying glass and save back your other supplies**. Always remember to save supplies whenever possible. A "Glass" magnifying glass is preferred over plastic lenses, but I think nearly any of them with at least a 1 ½ - 2+ inch lens would work. Once you purchase one, make sure to try it, see if you can at least get smoke. You may have to try several different tinder type materials, like tree bark.

*Also if you are in a situation and you need fire, or if it is no longer of any use and you are going to trash it instead of carrying dead weight, the lens in a camera will also work like a magnifying glass. But you have to "carefully" break apart the camera, making sure not to crack the lens, in order to remove it in one piece. When in a survival situation, you have to think of objects past their "normal" uses.

***Remember** with this technique you are just focusing sunlight to one central point, darker color objects absorb light and heat much better than lighter color objects. Dark colored tree bark or other dark tinder works better than light colored wood to ignite.

The third reusable fire starter that I want to mention is what is called **Fire Steel**. This is basically a rod with a metal striker (or you can use a knife), you scrape the rod and it creates a shower of 5500 degree sparks, which you can use to ignite dry tinder. With the thickness of these Fire Steel Rods, they last quite a while and you can literally start thousands of fires. Again, make sure to scrape the paint off the striker before use, otherwise you will not get any sparks.

Other fire starting items you can carry: regular matches & water proof camping matches (they run out, so do not use as only fire source) available at wal-mart and many other stores. Steel wool placed across two battery terminals (car battery, 9-volt, or even unscrew a flashlight and touch the steel wool to the positive and negative contacts.) ****Be careful when using steel wool like this, the steel wool wire will almost instantly turn red hot, and it can and does actually ignite into a flame!**

Starting Fire by Hand: If you take the time to obtain the skills (or even if you don't have the skills, and you have no other alternative), you can make fire by literally rubbing two sticks together. This is called a **Friction Fire**. All of the different types of these tools are made out of wood, usually dead tree samplings or very straight dry branches. **With these you can make several tools such as:** hand drills, fire plows, and if you have a piece of string or shoe lace, a fire bow. Run a search on YouTube and google for information about types of wood, what is required, and even video demonstrations.

Fire Tinder: You can get dry fire starting tinder almost anywhere outside, like birch bark, scraped cedar bark, or other tree bark, "punky" wood (wood that has rotted to a degree, but has dried out), dry leaves & grasses, "old man's beard" (a type of moss that hangs from trees in certain area's), and so on.

But there is also some easy fire starting tinder that you might want to carry, to at least get you started if you are not used to having to do this, or you can use as a backup if you are having a hard time finding dry tinder. Sometimes you just have to think "outside the box":

Cotton balls – You can use dry or swab them in petroleum jelly (vaseline) and the dry part of the cotton will catch a spark or flame very easy and the vaseline will make them burn for several minutes with a wicking effect. You may want to make these up ahead of time and place them into an empty film canister. (If you get to much vaseline on the cotton ball for it to catch a spark, just tear it open to the dry interior)

Q-tips ends – they are also cotton.

Corn chips & and most other types of chips - the oils in the chip will burn hot for a minute, the chip itself becoming the wick.

Hand sanitizer – has an alcohol base that will catch a spark, but remember alcohol burns almost invisibly.

Bullets – carefully take out the "bullet tip" with pliers or multi-tool pour out the black powder and use it to catch a spark. ****You must have the powder on your tinder bundle before you ignite, as black powder burns almost instantly once ignited.**

SCENARIO: If you do not have any fire tinder or kindling and it's been raining for hours soaking everything, what do you do? Well, find a good dry dead tree, if it is still standing is best. Take an axe or hatchet, chop into the wood. Even though the wood outside is soaked with rain water, the wood inside will be dry. Once you expose the interior of the wood, take the hatchet or a strong knife, and chip and scrap off small pieces of wood and shavings for tinder & kindling. If you can get larger pieces, they will burn well with less smoke than the wet wood.

WATER

You can go without food or with only very little food, for at least several days. But the need for **drinkable water** is very immediate, as you can only go a couple days especially when trying to travel or work. Dehydration brings on a multitude of problems, from headaches, to fatigue, not being able to get warm (*which is compounded in winter conditions*), weakness, and much more. But you can't simply drink from just any stream, river, or pond. If you do so, and you happen to ingest parasites, it can cause from mild to major digestive upset, sickness, or even death. To drink or use water from any type of outdoor source, you must purify it from parasites, bacteria, and other. Most people think that water filters will do this, but this isn't entirely true. While outdoor camping type water filters are very good at removing chemicals, you have to be careful with parasites, so read the details. And even if the filter is supposed to remove them, in my opinion, there is still a chance that is not worth taking if the time is available. The easiest way to kill parasites is by boiling the water, again another reason why fire is so important in any situation. Although boiling water for just a minute or so should kill most any organism, to be safe the suggested time by many experts is 5-10 minutes. Also remember though that boiling water does not remove chemicals, so that is where a filter helps. But most chemicals shouldn't be a huge concern, as city tap water probably has more chemicals and other poisonous compounds in it than the majority of streams do. **Although, if you have a filter, use it. **If you have to drink water without boiling/filtering it, then try to find a stream or tributary to drink from, instead of the main river or other body of water. As the smaller feeder streams are likely to be much cleaner than the main body of water which gets everything dumped into it.**

FOOD

You can carry some food with you, but you can only carry so much due to space and weight. So I would recommend just the MRE main entrées (seen right), they are the main food dish in an MRE full size meal. But by just carrying the entrée, you are saving a lot of space, and you can carry up to 30 entrées without taking up a lot of room. Take them out of the box and save even more room. Also these do not have to be heated to eat, as they are fully cooked. But if you have a fire and something to boil water in, like your canteen cup, you can have a hot meal. These MRE entrées will get you by for a while, I plan on only eating one per day to extend supplies as long as possible. **You can also pack:** Beef Jerky, Tuna in the sealed pack, dried fruit, can food (*make sure to have a small can opener, such as a military can opener.*) You should have at least enough food, to eat something each day for 30 days. But no matter how much food you pack, you will need to be able to obtain food at some point, whether it is acquired by fishing, hunting, or gathering plants. Just pray that Yahuah Provides. If you have a vehicle with some storage space, you can pack much more food, and heavier/bulkier items.

FOOD CONTAINER SURVIVABILITY TEST: To make sure the food you are storing will be there when you need it most, you need to test the food containers to make sure it can with-stand an outside environment. If it's stored in your pack or in a vehicle/trailer, make sure that all food you are taking can be exposed to **sub-freezing temperatures** without destruction. When outside a "controlled environment", in winter temperatures you will have no way to keep food from freezing. So if you have food that will go bad, or if the package is compromised by freezing, you have lost your stocked food supply. To test containers for leakage, "blowouts", or other container compromises. Take one of each item to be tested, place it in a zip lock bag just in case it "explodes" or something. Then place the item in your freezer overnight, I would say

for at least 12-15 hours to make sure it is fully frozen. Then remove the item from the freezer and inspect for any deformation. If there is a small amount of deformation, depending on the items package, like can food that is slightly swelled, you may still be OK. If it looks to still be sealed, let the item sit out and fully de-thaw and come back up to room temperature. Once it has thawed out, check and see if there is any leaks. If it looks ok up to this point, set the item aside for a few days. After several days to a week or so, open the item, see if the contents are still fresh and not spoiled. If all seems well, prepare and eat. If the item has passed all these tests, it should make a good food item to store up which can survive winter temperatures. You can do this to several different items at once to speed up the testing process.

You should be testing all of your survival gear that you will need to rely upon when the time comes. Because if you find out Now that something doesn't work, you can fix or replace it. But once we are out there, there is no second guessing or a second chance to get a replacement. At that time, **It Must Work**.

FISHING: Although one might be able to fashion a hook out of some wire or other materials, if you want to increase your odds of catching a fish, you really need at the very least some basic supplies: Hooks, weights, line, float, plastic baits, etc. If you would like to really boost your chances, as it will add a great deal of reach, bait placement, & retrieval, a compact fishing reel and pole is a great addition. There are many different types of compact fishing poles on the market. **Do your Research and study reviews**, this is one time that you don't want to just grab anything, as there are many products which do not hold up. From the research that I myself have done on this, it seems in general the **worst type** of compact or "travel type" fishing rods to buy is the telescoping rods. I have read many reviews which stated on the very first use, something broke or didn't work properly. And many others stated just after a couple of uses, the rod didn't want to stay extended, eyelets broke, or worse. So too many problems with this type, unless you have personal experience and know of a good reliable one. The next rod is the break down travel rod. It is similar to a standard fishing rod, except most of them break down into approximately 5 sections instead of only 2. This rod seems more useful and sturdier than the telescoping rods. But it is still a standard fishing rod material, either fiberglass type composite, or classic bamboo. So care must be taken to keep them from snapping. You can place them into a hard case, or make a case with a short section of pvc pipe with screw caps to protect them, either inside or strapped to the outside of your pack.

The most compact and sturdy option that I found is called the Emmrod Packer Fishing Pole (photo seen at right). Originally designed for kayakers, it is a short stainless steel rod with spring coils for sensitivity. It is held into the handle by a spring lock, just push down and a simple quarter turn, and the rod disconnects from the handle to make it even more compact for packing position. This is a very compact rod and reel, only 22" inches in length when assembled ready to use, as seen in the photo. But I have read many reviews on this rod, and people state that it casts like a 6 or 7 foot pole. Not the cheapest rod, about \$60 with handle (not including reel), but it will mount any normal reel. So if you have a reel that you would like to use, or if you want to buy one locally, it will fit into the standard mount. Also you can buy additional stainless "rods" only, if you want to change to a different rod for a heavier or lighter weight fish. The more coils the rod has, the lighter weight and more sensitive the rod is. The heaviest is a 4 coil rod rated for fish up to 25 lbs, the lightest is a 8 coil rod rated for 2 lbs or less. I suggest an 8 coil and a 6 coil for most common fish types, which gives you a range of 1-10 lbs.

Website link: <http://www.emmrod.com/products/Packer%C2%AE-fishing-pole.html>

If you don't want to pack a reel & rod, then you might want to just pack small kit with fishing line, hooks, few weights, maybe a small float, and a couple of plastic baits, in a zip lock bag. What this will allow you to do, is to take a stick and use it to catch some small fish. **** Note: As told to me by my Brother Binyamin here:** If you use this method instead of a reel and pole. **Do not hold the string directly in your hand**, wrap the string around a good sturdy stick or something else. As if by chance a large fish grabs your bait, the string can easily cut into your fingers or hand. So you not only will probably lose the fish, but you will also have an injury. Which even something small can severely make things harder to do when in a survival situation. **Don't take chances on getting hurt in the wilderness, think things out, and use common sense.**

HUNTING: Most survival shows and books, show all the kinds of "game" you can catch with snares and other traps. But we as Yisrael **Must Adhere** to the **Clean Food Laws as Yahuah has commanded** in His Word. **So as far as hunting wild animals goes, most of what we can eat we need a rifle or at least a bow to hunt: deer & related, turkey, pheasant and related birds.** Besides defense, this is why a rifle in a hunting situation is a very important tool for the best opportunity. Although in certain scenarios, such as a nest or possibly finding the place where the birds roost, it is possible to get birds without a rifle. But your chances are far reduced.

Regardless of what you are using to hunt with; rifles, handguns, or bow/crossbows, you will need ammunition. As far as what you can carry in your pack, you are going to be mostly limited on the amount of ammo by how much it weighs. Ammo is heavy and adds up quickly. So you will most likely only be able to carry a small container(s) in your pack, plus a few full clips. If you have a vehicle that you will be using to store additional supplies in, you can store much more ammo as weight shouldn't be an issue.

GATHERING PLANTS: Very few people today have any knowledge about most wild plants, except maybe a few common things like blackberries. **If you do not know for sure what a plant is, Do Not Eat It.** Eating the **wrong plants**, or even the **wrong part of a plant** can (at the least) make you sick and worst case it can even lead to death. So **unless** you know what a plant is and what parts of the plant is edible, stay away from them. But there are a couple of resources that I have seen many people and even survival experts recommend, which will help you identify a plant, what part that is edible, and even how to prepare it. But again there are other manuals and books out there, this is just a few suggestions:

A Field Guide to Edible Wild Plants: Eastern and central North America
(Peterson Field Guide)

A Field Guide to Medicinal Plants and Herbs: Of Eastern and Central North America
(Peterson Field Guide)

The Forager's Harvest: A Guide to Identifying, Harvesting, and Preparing Edible Wild Plants

I have ordered all three of these books as they shouldn't take up that much space, and may be invaluable when it comes to knowledge and identification of plants. I found all three of them for sale on Amazon for \$35.97 Just look for the "**Frequently Bought Together**" title under the main photo at this link: <http://www.amazon.com/Field-Guide-Medicinal-Plants-Herbs/dp/0395988144>

SHELTERS

There is only a couple types of shelter that you can carry. An actual tent, or a tarp which you can use to make a “tent like” structure. If you buy a tent, keep some things in mind. It will have to last, so a cheap made tent, will only help you out for a short time. It must be light weight, as you will have to carry it whenever you travel, so you don't want a 20-30 lbs tent. It needs to be able to withstand winds, rains and wind driven rains, and storms, as you will be using it through all kinds of weather. Snow load capacity, and winter “double wall” type tents may be things to think about, as Yahuah's Word states in

Luka 21:11 *“And great earthquakes shall be in diverse places, and famines, and pestilences; and fearful sights and great signs shall there be from the shamayim; and the winters shall be severe.”*

Which brings in another point, a tent in which you are able to bring in a small wood burning “stove” or a stove made from a metal can, commonly called a “hobo stove”, this would make a great advantage. But you must be careful not to burn down your shelter.

You can also use a regular tent for most occasions. But when the need for a fire inside your shelter arises, you can build a “bush shelter” and bring the fire inside of it, without risking your main tent.

TENTS

At first, I was only going to carry a tarp. But after further consideration, I decided a tent would be a better choice. But I decided to keep a tarp as additional supply, possibly to put under or over my tent, or I can use it for a backup shelter. I did a lot of searching and research when looking for a tent. There is a lot of terms you need to become familiar with, and what qualities make a tent a viable long term use shelter. I quickly found that many small “backpack” type tents were sold out, no matter what store you tried to get them from. Some of the more expensive tents were still available, but most only held 1 to 2 people. Another problem that I ran into was the color. It seemed most tents were bright colors like red, yellow, or blue. After carefully considering all the factors and qualities needed, and after about a month of searching. I finally found a tent called the **Eureka Assault Outfitter 4**. This tent is a 4 person - 4 season tent, which means it can be used year around. It has two large doors, one front and one back, which can be opened for ventilation, plus two small vents inside. But they can be completely closed up to block out all wind, which is great in cool or cold temps. It also has the main tent body, then a large Fly which covers the entire tent for an additional layer of water protection. Plus the fly creates a covered area in the front and back of the tent which can be used to keep equipment, boots, or other items, covered, dry, and within reach. It has a high water resistance, even from wind driven rain. A “bathtub” type floor prevents water from reaching the seam and leaking into the interior. Half inch aluminum poles give it a sturdy frame that will hold up to storms and snow loads. Also if a pole does break, unlike fiberglass poles, aluminum poles can be repaired. It is not the lightest tent, but is far from the heaviest. It weighs in at just over 13lbs. But as stated before, this is consider a 4 person tent. For comfort, I suggest to view it as a 3 person tent, this will give everyone a little more room, especially if additional materials or supplies is brought inside. In any case, the weight could be divided up between several people if needed when carrying, but one person should be able to strap it to their pack and carry if required. This tent commonly sells for just over \$400. But I continued

searching different stores and found a few with better prices. The lowest that I finally found was for \$289 from Dom's Outdoor Outfitters. We ordered the tents and ground cover (piece that goes under the tent for extra protection for the floor) and received them very quickly. Here is the link to their site and the Eureka Assault Outfitter 4: <http://domsoutdoor.com/Eureka-Assault-Outfitter-4-Tent/p/1-034881/>

TARPS

Tarps are very multipurpose tools, and can be used for everything from a ground cover, equipment cover, rain catch, wall/blind, etc etc. You can also choose to carry a tarp for a shelter. In any situation or use, you need something that will last. The cheap poly (plastic) tarps that you see at most stores, (*although I also have one of those as a secondary*) will only last so long if used daily. But they are light weight, and do have good uses. But my main tarp is a heavy duty "10 ounce" industrial grade cotton duck tarp. These wear much longer, and can take a beating. Also the sun does not deteriorate them like it does to poly plastic tarps. But they do have one drawback, they are heavy to carry. I have a 10 x 12 (9x11 finished size) and I guess it weighs about 10-12 lbs. It is also very thick when folded up, but it makes a nice pad between my back and the backpack frame ☺ With a tarp and some string/rope, I can make a quick shelter. Also if I build a bush shelter I can use the tarp as a roof, or additional layer of the roof to seal out water. If needed, it can even act as an additional cover for my tent. Here is a site I just came across showing a couple tarp shelters: <http://www.m4040.com/Survival/Skills/Shelter/TarpShelter.htm>

BUSH SHELTERS

If you are going to stay in one area for a while, and you have some time, you can also build shelters from what Yahuah has provided in nature. I cannot explain all the details on how to build these

Debris Hut from Survival Topics.com

shelters, but you can search on YouTube & Google as there are many survival websites which do go into detail about different types of shelters. Plus as you build them, you will find your own ways of customizing them to help your needs. One site which I found interesting was:

<http://www.survivaltopics.com/survival/debris-hut/> and you can see a photo of one the shelters they show which is called a Debris Hut. This one has the addition of using a tarp as an extra layer of water protection.

Main Tools

Good Multi-Tool: There are many multi-tools on the market, but remember in a survival situation if a tool breaks, you don't have a means to replace it. So after doing a lot of research, for me one brand stood out, Leatherman Tools. After reviewing all the models, and a lot of searching, I was able to find the Leatherman Surge. I chose it because of its heavy duty construction with a broad collection tools. My second choice would have been the Leatherman Wave.

Axe: An Axe is an essential tool. You will be using it for everything from fire wood, to building your shelter. A full size Axe is a little large and heavy, so I chose a light Axe. It is only 2 ¼ lbs head, with a shorter handle. If you want something even smaller, at least get a good hatchet. A full size axe is not a bad idea either, it's heavier weight means you won't expend as much energy chopping or cutting, as the axe will hit harder and do more of the work for you, when compared to a light axe or hatchet. In any case, make sure one side is blunt as you can use it for a hammer instead of needing a separate tool.

Knives: A good knife is a mainstay and very essential tool. You should have several knives, from a strong fixed blade knife, to a folding or pocket knife. If one breaks or is lost, you need to have backups. You also need some way of sharpening your knives. A compact ceramic or diamond sharpener is a good choice. If you are good with a sharpening stone, then that is also a good choice. Fine grit sandpaper, with a little practice, is an excellent way for a fast edge. Again, it would be best to have a couple different ways to sharpen your knives, in case something breaks or is lost.

Folding Shovel: Used for everything from digging a fire pit, to digging for plant roots, to even shelter building. A good all purpose tool. Every person doesn't need one, but at least a couple in a group.

Windup-Solar Powered Radio: Once you are in the wilderness, it would be good if you had a way to hear any possible communications that were being broadcast. After doing a lot of searching, I narrowed it down to a radio with the most possible combined features & frequencies that I was able to find. The **Kaito KA500 Voyager Solar and Crank Radio** has AM/FM, NOAA, & Short Wave. Here is the link with full specs: <http://www.21st-century-goods.com/products/Kaito-KA500-Voyager-Solar-and-Crank-Radio-with-USB-Cell-Phone-Charger.html>

Solar Panel: Portable Solar Panels give you the ability to take the sun's energy and convert it into useable power. A good flexible fold up solar panel will give you the ability to charge batteries for small devices, such as: flash lights, radios, rechargeable hair clippers, tools, and much more. If you get a larger higher wattage solar panel, you can get more power to charge larger devices, and do it in a much shorter period of time. Another good advantage a solar panel will give is the ability to recharge your vehicle's battery. Without an A/C power source, this will be the only way to re-charge your vehicles battery if the need arises. The same website that has the radio on the previous page, also carries several different flexible solar panels and their required accessories.

<http://www.21st-century-goods.com/categories/Solar/Flexible-Solar-Panels/?sort=bestselling> \

Also here is the website where we purchased our **Low Self Discharge Rechargeable Batteries**. Here is the link to the page which explains some about the Low Self Discharge battery:

http://www.all-battery.com/nimh_centura_list.aspx

But for the best prices, click on this link for "Battery Saving Combos" page, as you can save \$ by buying packs of 12-24 batteries. This page contains at least three different batty types. Look for the Low Self Discharge Batteries which are White and Green in color (*the white and blue are not the low self discharge*)

<http://www.all-battery.com/batterysavingcombos.aspx>

Remember you will also need a charger! Preferably one that can charge all types: AA, AAA, 9v Etc. Such as this one <http://www.all-battery.com/bc1hu110-240vuniversalfastsmartchargerforallbatteries.aspx> Don't forget the "car" cigarette lighter power adapter, you will need that to connect the charger to your solar panel.

Handheld Two-Way Radio's: When these things happen, cell phones and similar devices will no longer function. You will need a way to communicate with the members of your group, because there will be times that each person will have to leave camp. Also if someone gets separated or lost, they would need to be able to contact the other members of the group. A two way radio would give you this ability. In researching different types of radios, the best type of standalone handheld radio that I have found is what is called a UHF/VHF Dual Band Handheld. The dual band give you more flexibility in the radios operation. If one band does not work, or doesn't work well, in the terrain you are in, then you can switch over and try the other band. These radios also should have a good distance reach. There are many different types and brands of the Dual Band handheld radios on the market. But they basically start out at approx \$125 a pair. And for the main best known brands, like Yaesu, they start out around \$149 Each.

Now having said that, there is one other less expensive option. And that is the FMS/GMRS Handheld Radios that you can buy at many retail stores, also known as Walkie Talkies. However these do have several drawbacks. The first major drawback is their transmitting and receiving distance. If you have ever purchased a set of walkie talkie radios, you know that the distance listed on the package is a joke. So understand that if it states they are 35 mile radios, expect them to only reach approx 2 to maybe 3 miles (3.2 – 4.8 km) in most real life situation. Another problem is usually battery life. Even with the rechargeable battery packs, most models only last a few hours. So having an extra set of batteries is a must. Some models can use multiple batter sources, besides their rechargeable battery packs, they can also run AA batteries, which makes it easier and cheaper to have a back up batteries. This is another reason to have rechargeable batteries, charger, and a solar panel.

VEHICLE & TRAILER/STORAGE

A Vehicle is going to be an essential tool to have, not only for transportation, but to carry additional family members and supplies. However there are things to consider. I know most people will just have to use whatever vehicle they currently have. But there are points that must be considered. Will your vehicle carry the number of people that will be going with you when Yahuah saids "GO"? Will you have to take multiple vehicles? Can your vehicle go off road? What fuel range does your vehicle have, and how much additional fuel can you carry? Do you have a trailer to carry additional supplies and materials, such as additional fuel and your food storage?

If you are considering what vehicle to use, or if you are thinking of purchasing a vehicle to use for this purpose. There are a few suggestions: **A Good 4x4 older (1979 or before) off road capable Truck**, as you can carry supplies or people in the bed. **I say 1979 or before, because they do not have the computers, sensors, and electronics that new vehicles have. The electronics on newer vehicles are prone to damage and can disable a vehicle completely. Plus if there is an EMP (Electro Magnetic Pulse) event, either from the sun in the form of a powerful solar flare, or a nuclear or EMP Bomb, or other similar event, all vehicles that are hit with the emp which have computers will stop dead where ever they are.** Now you know why the government run the "Cash for Clunkers" program at least three times in an attempt to get rid of as many of the older vehicles as possible. For all of the people who literally don't have the resources to get a vehicle that doesn't have computers and such, the only thing I can say is I pray that Yahuah protects and keeps your vehicle from any damage. Also a cargo rack that bolts into the hitch, or better yet a box trailer, that you can lock, which has been raised for off road use, would be a good initial resource to have to carry additional supplies and fuel.

If you happen to already own (as a few people do for different reasons) or if you are looking to purchase a vehicle. Another option is a military Deuce and Half (M35A2 or M35A3). Although this seems to be “over the top” it really isn’t. This vehicle is designed to haul people and/or supplies. There are fold down benches in the back that can be used to carry a group of people, family, etc. You can also haul supplies, and an

extra fuel tank, and if the bed isn’t enough space you can also add a trailer. This truck has a 50 gallon fuel tank, and depending on the model, you will have a range of 300-500 miles with that tank alone. If you add several large tanks, like good fuel oil tanks, or build a tank with a capacity of at least 250+

gallons. You can carry it in the bed behind the cab and extend your range a great distance. Plus, you can acquire fuel from difference sources if you have the right pumps and tools, depending on the catastrophe and situation. Also these vehicles do not have computers or sensors, so they are not prone to electronic damage or emp type events. These vehicles were also built for on road and off road rough terrain use. They can also go through flooded areas or across small

riders and creeks with out to much of a problem.

Any vehicle that does not have the computers and sensors, should survive without too much of a problem. But not matter what vehicle you have, you should have some basic extra parts, such as: **Alternator, starter, rebuild kits for both if available, starter solenoids, and other small essential electronic items needed to start and run a vehicle.**

No matter what vehicle you have, you need to carry an extra fully charged battery(s), and a set of good quality jumper cables. If you need to jump your vehicle, you can use the extra battery as the “jumper”. Also you will want to switch out the extra battery with the one in your vehicle every so often to keep them both in good shape. You would also have to charge your extra battery off the solar panel every few days to keep it in good condition, and charged up. You may even want to go to an auto parts store, and ask them if they carry battery acid in a box. It’s cheap, and if your battery goes bad, sometimes you can drain it and refill it with acid and water, then recharge (solar panel) and it will work again.

Speaking about a trailer, depending on your situation and how much you need or want to carry. A trailer can add a good amount of storage. It can be used for **Bulk Food Supplies, water** (55 gallon barrel(s) if possible), equipment (like tents, packs, etc) and other supplies, additional fuel (100+ gallons), and other tools. I don’t care what kind a vehicle you have, in my opinion, you should have at least a 150 gallons of extra fuel. If your vehicle is larger, like a large truck or a deuce, if you can carry 250 gallons it would give you a great asset, and give your vehicle a much larger range and running time.

You also need tools to be able to do basic repairs on your vehicle and equipment. You could also add a small generator to give you the ability to run electric tools and other supplies. Other good supplies to have is things like bolt cutters, gloves, leather gloves, 110v welder (runs off generator), small and large channel lock pliers, general hand tools, and even a small set of propane torches. Tools are always a great asset to have in any situation. Prioritize your tools by the amount of space you have, make sure to cover all the basics plus the needful essentials if at all possible. You don’t know what you may need the ability to do once in a situation.

The Basic Supply “Short” List

On the next page is a list of basic supplies that I have come up with, note that some of the things we have discussed is not on this “basic” list. I made this so you can print it and take the next page with you when you are purchasing your supplies. **This is by no means a complete list of everything you need.** I made this list as a tool and a help to get you thinking in the right direction. It’s just a basic supply list, as these are supplies that every person will need access to. But I may have forgotten to add some items, or you may have some items that are specific to your needs that you can add to this list. So be prepared to do your own research and make sure you get everything you and your family needs. If you print this list on the next page, you can turn it over and write down the items and ideas that you think of. With this preparation, and more so once you are in the wilderness, you will really have to use your head and think things through. **Try to get items that can cover multiple uses, but at the same time work well.** Just because something is supposed to do the job of 5 items, doesn’t mean it will do any or all of those jobs well.

Again many of these items listed on the next page which have the “*”, you only need 1 or 2 of that item for your entire family or group, like shovels and axes. This is done for weight dispersion, and the ability to carry alternate items. For example, one person carries an axe, while another carries a shovel, and so forth.

BE PREPARED “GRAB & GO” SURVIVAL PACK: BASIC SUPPLY SHORT LIST

ESSENTIALS: Military Back-Pack Built on Frame for Support & Long Distance Travel
Needs Rifle Holster or at least be able to Strap the Rifle to the Side of the Pack
Military or Very Good Hiking Boots – Need to be Water Proof & not made of pig

Hunting/Defense:

Hand Gun (i.e. 9mm, .45, etc)

Positioned in an “Easy to Grab” Waist, Shoulder, Front, or Side Holster

Rifle (i.e. SKS, AR15, etc)

Needs to be for Hunting at Longer to Short Range

Ammo For All of Your Guns - In Sealed Water Tight Dry Packages Need Qty but remember weight is an issue

Knife – A Knife is a MUST Have Essential! It is a tool which you can use in all parts of survival. You need to have several knives, in case one get broke or lost.

Hardware:

Pocket Knife

Quality Multi-Tool

Machete

Short/Light Axe or at least a Hatchet*

Hand Saw* - A compact non-powered/hand powered “chain saw” is the best type that I have found. Be careful with “cable” type cutting tools, the cables can break easily if not a good quality.

Military Folding Shovel/Pick Combo Tool*

Canteen – Metal is best, but plastic works just be careful not to crack or break.

Mess Kit & Utensils– Gives you something to cook and eat out of.

Crank Up Flashlight allows you to recharge by cranking

Compass* Depends on the Shifts in Earth’s Magnetic Field

Clothing & Related:

Sleeping Bag and/or Wool Blankets

Several Pairs of Good Quality Dry Socks

A must to stop foot fungus

Clothes – Camo or Earth Tone Colors

Other Supplies:

Reusable Fire Starters – i.e. Fire Steel Sparker, Magnesium Sticks, magnifying glass, etc

Do Not rely upon a gas lighter or matches, as gas runs out and matches get wet, broken, and run out. - Could have good bic lighter as additional

Tarp - You can use to make a quick shelter, like with trash bag only much stronger, improve a shelter’s water-proofness

M.R.E. Entrée – The Entrée is much smaller and costs a lot less than an entire MRE. Allowing you to carry many more of them. 12-14 Entrees would equal about the size of just 2 MRE meals. But you must boil water in your canteen cup or metal container to heat them if you want them hot, however you can eat them at room temperature if needed.

Other Foods – such as Beef Jerky, Dried Fruit, canned foods, Family Pack sized Tuna in the soft aluminum/plastic packs, possibly even pasta.

Bungee Cord* and/or Nylon String – “Catfish Line” is a much larger roll and has greater tensile strength

New Rope – Get at least 100lb+ strength

550 cord - aka Parachute cord Small & Has Many Uses

Medicated Foot Powder – Helps to keep feet dry

Emergency “Space” Blanket Small & Has Many Uses

Roll of Heavy Duty Trash Bags Small & Has Many Uses

Compact First Aid Kit* - These Resources Can be Very Useful for Injuries & Much More

Make a Kit Yourself or Buy One. But make sure it Includes or You Add Other Items Such As: Needles, Nylon Clear “Plastic” Thread for stitches, butterfly closures, gauze, alcohol, Vaseline, cotton balls, etc.

*** Only Need 1 or 2 of this Item Per Group**

Remember: Weight is a **Big** Factor, as **You** have to **Carry** this pack, possibly for long distances, so keep this in mind with your supplies verses what you are able to carry.

GENERAL SUPPLY SITES:

I have spent the past several months and many hours on the internet trying to find the best places to order things from, instead of ordering from 50 different places. I have ordered from several sites, but mainly I found three that has a good amount of the Equipment supplies needed. Again whatever you can find locally is best and the quickest. But if you just can't find it anywhere else, here are a few suggestions, but you will have to look the sites through thoroughly. As everything might not be in the category you expect, or the "search" features may not work as well as it should. Also I have just added several Bulk Food and Grain Sites. Along with food, you also must remember and think about your water supply. If you have a vehicle with a trailer, this again is will be helpful, as you will have the ability to carry some clear drinking/cooking water with you. Also, you will need a way to purify water, and you can refill your storage containers when you come to a good water source. A lot of thought and planning has to be done when understanding what is needed. No one can be sure of everything that will be needed for us to serve Yahuah, but we can do like Moshe told Pharoah in Shemoth 10:25-26 and take everything with us that we are able.

GET PREPARED...

In closing, I pray that this has been a help, and that you will be ready for the things that are coming. And I pray that Yahuah will lead you and guide you during these days of our Exodus, the 2nd Exodus of Yisrael. And to keep kol Remnant Yisrael safe during this time of trouble that is upon this earth. I pray that we all make to Eretz Yisrael/The Land of Yisrael one day soon, to fulfill what is written and promised to Avraham, to take the **Full Land** and be with Yahushua ha Moshiach at His Return. Many things are going to happen, many catastrophes and events. But we must keep our eyes upon Yahuah as He is our Only Refuge and Protection.

Selah (Pause & Think About it),

Shalom Alchem Yahushua Ha Moshiach Baruch Beshem!

(May Peace and Blessings be upon you in Yahushua the Moshiachs Blessed Name!)

Yahushua ben Moshe Elijahu

E-mail: yahushua@yhrim.com

"No Scripture Ever Contradicts another Scripture, if it seems to we just need to adjust our perspective until we can see them clearly. Unless you can use All of Yahuahs Word without throwing any out, you can't Teach that subject Fully or Correctly."

Ahmos / Amos 9:9-11 *"For, see, I will command, and I will sift Beit Yisrael among all nations, like corn is sifted in a sieve, yet the least kernel of grain shall not fall upon the earth. 10 All the sinners of My people shall die by the sword, who say, The evil shall not overtake nor find us. 11 In that day I will raise up the Sukkah of Dawid that has fallen, and close up the breaches of it; and I will raise up its ruins, and I will rebuild it as in the days of old:"*

Luka/Luke 21:28 *"And when these things begin to come to pass, then look up, and lift up your heads; for your Geulah/Redemption draws near."*
